#### **ONE Smile Committee**

The ONE Smile Committee was established in 2016 with the primary objectives of promoting employee engagement through charitable activities within the community, employee wellness promotion and professional development.

In 2020, the two charities supported were Saving Children and Revealing Secrets (SCARS) and The Living Reefs. SCARS began in 2011 and actively educates and promotes awareness on child abuse. The Living Reefs is an environmental charity that performs commendable work to protect the reefs and corals surrounding Bermuda. The Company is proud to partner with both of these charities. ONE Smile also provided a donation to the Coalition for the Protection of Children to provide a hot breakfast to children at a local school.

ONE Smile also presents a series of Lunch and Learn seminars to assist employees with their professional development by giving employees exposure to all aspects of the Company's business outside their main responsibilities and rising topics in the industry.

In an effort to promote further employee engagement, ONE Smile also organizes regular social activities.

FOR THE YEAR ENDED 31 DECEMBER 2020

Your directors present their report on QBE Blue Ocean Re Limited (the "Company") and the entities it controlled for the year ended 31 December 2020.

#### **Directors**

The following directors held office during the whole of the financial year and up to the date of this report:

- M. Angelina
- B. Carlino
- D. Duclos
- J. Fiore
- N. Jones
- A. Sodergren
- R. Stone
- J. Brown

#### David (Dave) Duclos

Chairman, Independent non-executive director

David was appointed non-executive director of the Company in May 2018 and is a member of the Audit and Risk and Capital Committees. David has over 40 years of insurance and reinsurance experience in a number of technical and executive level roles with CIGNA, XL and QBE. He also serves on the board of RLI Corporation, Non-Exec Chair of Lloyd's Global Network and on the advisory board of AAIS (American Association of Insurance Services).

#### James (Jim) Fiore

President QBE Group Chief Reinsurance Officer

Jim has had management responsibility of the Company since its formation in February 2018 and is a member of the Risk & Capital Committee. He also sits on the QBE Insurance Group Limited (the "QBE Group") Underwriting Committee and the QBE Group Security Committee. In his role as President of the Company, he oversees the day to day operations of QBE's reinsurance captive. In addition, he continues to work as the QBE Group Chief Reinsurance Officer. In this capacity, he is responsible for QBE's global ceded reinsurance strategy and purchasing, as well as the management and oversight of the QBE Group's exposures and accumulations. Jim began his career with QBE in 1992 and has over 36 years of industry experience.

Bruce Carlino Chief Claims Officer

Bruce was appointed to the Board in September 2018. He has been involved in reinsurance and insurance claims for 40 years. In 2015 he returned to the QBE Group and has served as the Chief Claims Officer for Equator Reinsurances Limited and the Company. In that capacity he is responsible for the claims management process. Prior to re-joining QBE, Bruce was the Head of Claims for HCC Insurance responsible for their Specialty portfolios. Bruce also was Head of Claims for QBE Re and QBE Specialty from 2002 to 2012. Bruce is a qualified US attorney and holds the Associate in Reinsurance, the Chartered Property Casualty Underwriters (CPCU) and Chartered Insurance Operational Professional designations.

Robert (Rob) Stone Chief Financial Officer

Rob was appointed to the Board as an executive director in April 2019. Rob has worked for the QBE Group for over 13 years and previously held various senior management roles within the finance function of QBE Group's European division. Rob is a Chartered Accountant and fellow of the Institute of Chartered Accountants in England and Wales (FCA). Prior to joining QBE, Rob spent 12 years within professional services. Rob is a member of the Risk and Capital Committee and a member of the Sanctions Committee, and also chairs the QBE Group Security Committee.

#### Michael (Mike) Angelina

Independent non-executive director

Mike was appointed as an independent non-executive director of the Company in May 2018 and is Chair of the Risk and Capital Committee and a member of the Audit Committee. He is an insurance professional, with over 33 years practicing experience. Mike is a qualified actuary, former Chief Risk Officer, and insurance professional with consulting, executive, and directorship roles throughout his career. He currently serves as an Executive in Residence of the Maguire Academy of Insurance and Risk Management of Saint Joseph's University in Pennsylvania, U.S., after serving as the Executive Director for nine years where he led the Risk Management and Insurance undergraduate program.

#### Jason Brown

Non-independent non-executive director

Jason was appointed as a non-independent non-executive director of the Company in August 2019. Jason has been involved in the financial services industry for over 30 years. Jason was the QBE Group Chief Underwriting Officer from January 2019 to March 2021. Jason's previous roles at QBE include Chief Executive Officer, QBE Asia Pacific; Executive General Manager, Technical & Operations for QBE Australian & New Zealand Operations with responsibility for underwriting, reinsurance, actuarial and acquisitions; Chief Risk Officer for QBE Australian & New Zealand Operations and QBE Group Chief Risk Officer. Jason joined QBE in 2002 after 13 years at Ernst & Young in the Financial Services Group in both assurance and consulting in Australia and the UK

FOR THE YEAR ENDED 31 DECEMBER 2020

#### **Neil Jones**

Non-independent non-executive director QBE Group Head of Underwriting Operations

Neil was appointed as a non-independent non-executive director of the Company in February 2018 and is a member of the Company's Sanctions Committee. He is also Chair of the QBE Group Technical Underwriting Committee. Neil has over 29 years' experience in the reinsurance industry, 26 years with the QBE Group.

#### Amanda Sodergren

Independent non-executive director

Amanda was appointed as an independent non-executive director of the Company in May 2018 and is Chair of the Audit and Sanctions Committees and a member of the Risk & Capital Committee. Amanda also serves on the Boards of Hellenic Mutual War Risks Association (Bermuda) Limited, The UK P&I Club and a number of the Validus AlphaCat funds. In 2020, Amanda also became an independent non-executive director of both OmegaCat Reinsurance Ltd (a carrier associated with the AlphaCat funds) and Pacific Life Re Global Ltd (a Bermuda Life reinsurer which is a subsidiary of the US Pacific Life Group). Amanda was Chief Legal Counsel and Chief Ethics Officer of PartnerRe Ltd until December 2012 and has over 30 years' experience in the insurance, reinsurance and banking industries.

#### **About the Company**

The Company is a company limited by shares, incorporated on 8 February 2018 and domiciled in Bermuda. The parent entity is QBE Investments (North America), Inc. and the ultimate parent is QBE Insurance Group Limited. The parent entity is incorporated and domiciled in the United States of America with its registered office at 55 Water Street, New York, New York, U.S.A. The ultimate parent is incorporated and domiciled in Australia with its registered office at Level 5, 2 Park Street, Sydney 2000, NSW Australia.

The Company has two wholly owned subsidiaries, being Equator Reinsurances Limited (Equator Re) and QBE Reinsurance Services (Bermuda) Limited (QRSB). QRSB was incorporated on 15 February 2018 and acquired by the Company on that date. Equator Re was acquired by the Company on 31 March 2018 from QBE Insurance Holdings Pty Limited.

The Company is a wholly owned internal reinsurer for the QBE Group. Based in Bermuda, the Company provides reinsurance protections to the QBE Group's operations in North America and through its subsidiary Equator Re provides reinsurance protections to the QBE Group's operations in other jurisdictions around the world. The Company aims to assist in management of QBE Group's capital and net exposure to large individual risk and catastrophe claims..

FOR THE YEAR ENDED 31 DECEMBER 2020

#### Result

Net loss after tax for the year ended 31 December 2020 was \$63 million.

The underwriting performance is underpinned by losses incurred on the significant quota share arrangement with QBE North America division. The QBE North America division incurred losses from elevated catastrophe claims and adverse prior accident year claims development, along with the detrimental impact to the level of discount on claims reserves through changes in risk-free rates.

Included within the insurance profit is a net benefit to the Company on COVID-19 related exposure whereby a proportion of the gross losses retained in the divisions are recoverable on the QBE Group reinsurance covers. Such recoveries are recorded within net investment income with further explanation provided in note 3.2.

The investment portfolio was severely impacted by COVID-19 market volatility, particularly in the first half of the year. While fixed income assets benefited from falling sovereign bond yields, realised losses on emerging market and high yield debt assets negatively impacted fixed income returns. Growth assets were substantially impacted by market volatility. The Company sold all listed equities, high yield and emerging market debt instruments to de-risk the investment portfolio in the first half of the year.

The Company, being a wholly owned insurance subsidiary of a US tax resident, has elected to be treated as if it were a US tax resident. The income tax expense for the Company also includes withholding taxes imposed on outwards reinsurance contracts in certain jurisdictions, which by nature must be accounted for as income taxes.

#### **Dividends**

Dividends of \$Nil were paid during 2020 (2019 \$100 million).

#### Shareholders' funds

Shareholders' funds were \$1,139 million at 31 December 2020 (2019 \$951 million). The increase is due to the issuance of share capital in 2020 of \$298 million, bringing total issued share capital to \$1,169 million (2019 \$871 million), partially offset by the net loss after tax for the year and the adverse impact of movement in foreign currency transalation reserve.

#### **Presentation currency**

The presentation currency of these financial statements is US dollar.

The functional currency of the Company and its wholly owned subsidiaries are US dollar.

FOR THE YEAR ENDED 31 DECEMBER 2020

#### **Outstanding claims liability**

The net central estimate of outstanding claims is determined by the VP, Actuarial Reserving and Capital, after consultation with internal and external actuaries. The assessment takes into account, amongst other things, a statistical analysis of past claims, allowance for claims incurred but not reported, reinsurance and other recoveries and future interest and inflation factors. The VP, Actuarial Reserving and Capital provides an annual opinion on the adequacy of the outstanding claims liability as approved by the Board.

The directors consider that a risk margin is required, above the actuarial central estimate, to mitigate the inherent uncertainty in the central estimate. The probability of adequacy of the outstanding claims liability at 31 December 2020 and 31 December 2019 was within the Board's approved risk appetite.

#### Indemnification and insurance

During the year, a related Company paid a premium in respect of a contract insuring directors and officers of the Company. In accordance with normal commercial practice, disclosure of the total amount of premium payable under, and the nature of liabilities covered by, the insurance contract is prohibited by a confidentiality clause in the contract.

No such insurance cover has been provided for the benefit of the auditor of the Company.

#### Significant changes

There were no significant changes in the Company's state of affairs during the reporting period other than as disclosed in this Financial Report.

#### Likely developments and expected results

Information on likely developments in the Company's operations in future financial years and the expected results of those operations have not been included in this report because disclosure of the information would be likely to result in unreasonable prejudice to the Company.

#### **Events after balance sheet date**

The directors are not aware of any matter or circumstance that has arisen since the end of the year that has significantly affected, or may significantly affect, the Company's operations, the results of those operations and the Company's state of affairs in future financial years other than the item noted below.

Given the evolving and uncertain impact of COVID-19, we anticipate that there are likely to be changes in market conditions in the future and the impact of these changes will be accounted for in future reporting periods as they arise. Further details is referenced note 1.2.3 of the financial statements.

#### **Material business risks**

As a global reinsurance business, the Company is subject to a variety of business risks. The Board believes that effective management of these risks is critical to delivering value for its stakeholders. It is the Company's policy to adopt a rigorous approach to managing risk; risk management is a continuous process and an integral part of the Company's governance structure, its broader business processes and, most importantly, its culture.

Some of the material business risks that the Company faces include strategic, insurance, credit, market, liquidity, operational and compliance risks. Explanations of these risks and their mitigations are set out in more detail in note 4 to the financial statements.

The directors are committed to high standards of Corporate Governance. The Company adopts a proactive governance framework consistent with the requirements of the Insurance Code of Conduct issued by the Bermuda Monetary Authority and the governance and risk management requirements and best practice standards of the QBE Group.

The Company makes judgements and estimates in respect of the reported amounts of certain assets and liabilities, the most significant of which are in relation to the determination of the outstanding claims liability and the application of the liability adequacy test. More detail of each of these is included in notes 2.3 and 2.5.1 respectively.

#### **Board selection criteria and terms of reference**

Directors are selected to achieve a broad range of skills, experience and expertise complementary to the Company's activities. The Board currently comprises eight directors including three executive and five non-executive directors.

In accordance with its charter, the Board's functions include:

- establishing financial and strategic objectives;
- evaluating, approving and monitoring strategic, business and financial plans;
- establishing and monitoring an appropriate governance and operational structure of the Company for the purpose of ensuring the sound and prudent management of the Company;
- approving and monitoring the Company's risk management and internal control framework to enable key business risks to be appropriately identified and managed;
- · approving and monitoring adherence to policies, including code of conduct, fitness and probity and outsourcing;
- monitoring the Company's operations against legal, regulatory and financial responsibilities;
- reviewing and ensuring the adequacy of human resources, information technology and other resources; and

FOR THE YEAR ENDED 31 DECEMBER 2020

• appointment and, where appropriate, removal of the external auditor.

The Board ensures it has the information it requires to be effective including, where necessary, professional advice.

#### **Company Secretary**

The Company's appointed Company Secretary is Compass Administration Services Ltd, a firm registered in Bermuda.

#### Directors' interests and benefits

#### Director fees

The Company paid directors fees of \$300,000 (2019 \$300,000) during the reporting period to independent non-executive directors external to the QBE Group, being David Duclos, Michael Angelina and Amanda Sodergren. Executive directors of the Company and non-independent non-executive directors are remunerated for their contribution to the Board as part of their overall remuneration package, paid either by the Company or another entity within the QBE Group.

#### Ordinary share capital

At no time during the year did any director have a beneficial interest in the shares of the Company.

#### Loans to directors and executives

The Company does not provide loans to directors or executives.

#### Other governance matters

The Company has adopted a code of conduct which outlines a set of general business ethics that apply to all Directors and employees when conducting any activity on behalf of the Company. The code of conduct requires employees to carry out business in an open and honest manner with customers, shareholders, employees, regulatory bodies, outside suppliers, intermediaries and the community. The code provides guidelines in respect of other requirements including whistle-blowing, confidentiality, disclosure of information, conflicts of interest and fraud.

#### **Environmental regulation**

The Company is not currently required to report upon any significant environmental regulations under Bermuda legislation.

#### **Auditor**

PricewaterhouseCoopers Ltd; Chartered Professional Accountants, Bermuda, continue in office in accordance with section 327B of the Corporations Act 2001 of the Commonwealth of Australia, and Bermuda's Insurance Act 1978, amendments thereto and related Regulations.

#### Non-audit services

During the year, PricewaterhouseCoopers Ltd did not perform other services in addition to its statutory duties, however a process remains in place by which any planned or actual activities are assessed. A copy of the auditor's independence declaration required under section 307C of the *Corporations Act 2001* of the Commonwealth of Australia is set out on page 8.

Details of amounts paid or payable to PricewaterhouseCoopers Ltd is provided in note 7.5 to the financial statements.

#### Rounding of amounts

Amounts have been rounded off in the Directors' Report to the nearest million dollars or, in certain cases, to the nearest thousand dollars.

FOR THE YEAR ENDED 31 DECEMBER 2020

#### Registered office and principal place of business

The Company's registered office and principal place of business is at the 4th Floor, 19 Par-La-Ville Road, Hamilton HM11, Bermuda. Signed in HAMILTON, Bermuda 28h day of April 2021 in accordance with a resolution of the directors.

J. Fiore

#### 1. OVERVIEW

#### 1.1 About the Company

#### About our ultimate parent, the QBE Group

QBE Group is one of the world's largest insurance and reinsurance companies. Formed in Australia in 1886, QBE employs more than 11,000 people and carries on insurance activities in 27 countries, with operations in Australia, Europe, North America, Asia and the Pacific

The QBE Group is listed on the Australian Securities Exchange and is a for-profit entity.

#### About our history and activities

The Company is a company limited by shares, incorporated on 8 February 2018 and domiciled in Bermuda. The parent entity is QBE Investments (North America), Inc. and the ultimate parent is QBE Insurance Group Limited.

The Company has two wholly owned subsidiaries, being Equator Reinsurances Limited (Equator Re) and QBE Reinsurance Services (Bermuda) Limited. QBE Reinsurance Services (Bermuda) Limited was incorporated on 15 February 2018 and acquired by the Company on that date. Equator Reinsurances Limited was acquired by the Company on 31 March 2018 from QBE Insurance Holdings Pty Limited.

The Company is a wholly owned internal reinsurer for the QBE Group. Based in Bermuda, the Company provides reinsurance protections to the QBE Group's operations around the world. Business written and retained by the Company is within the risk appetite of the QBE Group and is designed to support the management of aggregate exposures to any one large individual risk or catastrophe claim and to optimise the levels of capital held within the QBE Group.

#### **About insurance**

In simple terms, reinsurance companies help their policyholders (insurance companies) to manage risk. More broadly put, a reinsurance company creates value by pooling and redistributing risk. This is done by collecting premium from those that it insures, and then paying the claims of the few that call upon their insurance protection. The Company may also choose to reduce some of its own accumulated risk through the use of outward reinsurance. As not all policyholders will actually experience a claims event, the effective pooling and redistribution of risk lowers the total cost of risk management, thereby making insurance protection more cost effective for all.

The operating model of reinsurance companies relies on profits being generated:

- by appropriately pricing risk and charging adequate premium to cover the expected payouts that will be incurred over the life of the policy (both claims and operating expenses); and
- by earning a return on the collected premium and funds withheld to pay future claims through the adoption of an appropriate investment strategy.

Reinsurance therefore serves a critical function of providing customers with the confidence to achieve their business goals through cost-effective risk management. This is achieved within a highly regulated environment, designed to ensure that reinsurance companies maintain adequate capital to protect the interests of policyholders. The Company is regulated by the Bermuda Monetary Authority, who also liaises with other global regulators including the QBE Group regulator, Australian Prudential Regulatory Authority.

FOR THE PERIOD ENDED 31 DECEMBER 2020

#### 1.2 About this report

This Financial Report includes the consolidated financial statements of QBE Blue Ocean Re Limited (the Company) and its controlled entities (the Group).

The Financial Report includes the four primary statements, namely the consolidated statement of comprehensive income (which comprises profit or loss and other comprehensive income), consolidated balance sheet, consolidated statement of changes in equity and consolidated statement of cash flows as well as associated notes as required by Australian Accounting Standards, subject to materiality and commercial confidentiality. Disclosures have been grouped into the following categories in order to assist users in their understanding of our financial statements:

- 1. Overview contains information that impacts the Financial Report as a whole
- 2. Underwriting activities brings together results and balance sheet disclosures relevant to the Company's reinsurance activities.
- 3. Investment activities include the results and balance sheet disclosures relevant to the Company's investment activities.
- **4. Risk management** provides commentary on the Company's exposure to various financial and capital risks, explaining the potential impact on the results and balance sheet and how the Company manages these risks.
- 5. Capital structure provides information about the Company's capital.
- 6. Tax includes required disclosures in relation to the Company's tax balances.
- 7. Other includes additional disclosures required in order to comply with Australian Accounting Standards.

Where applicable within each note, disclosures are further analysed as follows:

- Overview provides some context to assist users in understanding the disclosures.
- Disclosures (both numbers and commentary) provides analysis of balances as required by Australian Accounting Standards.
- How we account for the numbers summarises the accounting policies relevant to an understanding of the numbers.
- Critical accounting judgements and estimates explains the key estimates and judgements applied by management in determining the numbers.

The notes include information which the directors believe is required to understand the financial statements and is material and relevant to the operations, balance sheet and results of the Company. Information is considered material and relevant if:

- the amount in question is significant because of its size or nature; and
- it is important to assist an understanding the results of the Company.

#### 1.2.1 Basis of preparation

This Financial Report is a general purpose financial report which:

- has been prepared in accordance with Australian Accounting Standards and Interpretations as issued by the Australian Accounting Standards Board (AASB), and complies with the International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board and Interpretations as issued by the IFRS Interpretations Committee (IFRIC);
- has been prepared on a historical cost basis as modified by certain exceptions, the most significant of which are the measurement of investments and derivatives at fair value and the measurement of the net outstanding claims liability at present value;
- is presented in US dollars; and
- is presented with values rounded to the nearest million dollars or, in certain cases, to the nearest thousand.

New and amended Accounting Standards and Interpretations issued by the AASB that are now effective are detailed in note 7.1.

The Company has not adopted any Accounting Standards and Interpretations that have been issued or amended but are not yet effective.

FOR THE PERIOD ENDED 31 DECEMBER 2020

#### 1.2.2 Critical accounting judgements and estimates

The preparation of the Company's financial statements requires management to make judgements and estimates that affect amounts reported in the profit or loss and balance sheet. The key areas in which critical estimates and judgements are applied are as follows:

- net outstanding claims liability (note 2.3);
- recoveries on the group reinsurance covers (note 3.2); and
- liability adequacy test (note 2.5.1).

#### 1.2.3 COVID-19

COVID-19 was declared a pandemic by the World Health Organisation in March 2020. The virus itself, as well as measures to slow its spread, have had a profound impact on the global economy. The Company has considered a broad range of factors to inform an assessment of the impact of the resulting uncertainty and general market volatility on the consolidated financial statements.

While the critical accounting judgements and estimates do not materially change, the impact of COVID-19 resulted in the application of further judgement within those areas. Given the evolving and uncertain impact of COVID-19, we anticipate that there are likely to be changes in market conditions in the future and the impact of these changes will be accounted for in future reporting periods as they arise and/or are able to be reasonably predicted.

Areas which are most significantly impacted by COVID-19 are as follows:

- Recoveries on the QBE Group reinsurance covers: The Company has recorded recoveries on the QBE Group reinsurance covers consistent with the expected contributing claims incurred across QBE Group in the year to 31 December 2020. Whilst this claims estimate has been based on a detailed review of exposures, scenario analysis under a variety of macroeconomic outcomes demonstrates significant uncertainty remains around potential claims emergence from credit exposed classes given the current levels of government stimulus and credit support from the banking sector. The Company will continue to monitor market developments closely, to ensure that the recoveries on the QBE Group reinsurance covers is reflective of the Company's best estimate of expected future claims.
- Liability adequacy test: This assessment is informed by the Company's expectation of future net claims including a risk margin
  and is therefore subject to the same uncertainties summarised above. Future claims assumptions used in the liability adequacy
  test have been prepared on a basis that is consistent with the COVID-19 assumptions informing the determination of the net
  discounted central estimate

The Company's COVID-19 financial impact assessment was not limited to the areas identified above. All material components of the balance sheet were considered in detail, as was the effectiveness of QBE's risk management framework in responding to both financial and non-financial risks, with no material issues identified.

#### 1.2.4 Foreign currency

#### Translation of foreign currency transactions and balances

Foreign currency transactions are translated into functional currencies at the spot rates of exchange applicable at the dates of the transactions. At the balance sheet date, monetary assets and liabilities denominated in foreign currencies are retranslated at the rates of exchange prevailing at that date. Resulting exchange gains and losses are included in profit or loss.

#### Translation of foreign currency ledgers

A wholly owned subsidiary of the Company accounts for transactions in three separate currency ledgers, each reflecting a major operating currency of one of the QBE Group's operating divisions and the underlying nature of premium and risks ceded to the subsidiary from each QBE division. Results and balance sheets of these foreign currency ledgers are translated into US dollars as follows:

- · income, expenses and other current period movements in comprehensive income are translated at average rates of exchange; and
- balance sheet items are translated at the closing balance date rates of exchange.

On consolidation, exchange differences arising from the translation of net assets are taken to shareholders' equity and recognised in other comprehensive income.

During the year the wholly owned subsidiary transition to a single US dollar currency ledger. The assets and liabilities of the non US dollar ledgers were nil as at the balance sheet date. Income, expenses and other current period movements in comprehensive income generated in the non US dollar ledgers up until the date of transition to a single ledger currency, were translated at average rates of exchange.

#### **Derivatives and hedging transactions**

The Company uses derivatives in mitigating risk associated with foreign currency transactions and balances.

#### **Exchange rates**

The principal exchange rates used in the preparation of the financial statements were:

	2020		2019		
	PROFIT	BALANCE	PROFIT	BALANCE	
	OR LOSS	SHEET	OR LOSS	SHEET	
A\$/U\$\$	0.688	0.771	0.695	0.702	
£/U\$\$	1.283	1.368	1.276	1.325	

FOR THE PERIOD ENDED 31 DECEMBER 2020

#### 2. UNDERWRITING ACTIVITIES

#### **Overview**

This section provides analysis and commentary on the Company's underwriting activities. Underwriting, in simple terms, is the agreement by the reinsurer to assume reinsurance risk in return for a premium paid by the reinsured. The underwriter assesses the quality of the risk and prices it accordingly.

#### 2.1 Revenue

#### **Overview**

Revenue comprises premiums charged for providing reinsurance coverage. Inwards reinsurance business assumed is largely from related entities on either a quota share or excess of loss basis. QBE Group exited Latin America and certain areas in Asia in 2018 and 2019. This business that the Company and its subsidiaries wrote in these areas is now in runoff. Materially all outwards reinsurance business is placed with third parties. Other sources of revenue include amounts recovered from reinsurers under the terms of reinsurance contracts and commission income from reinsurers.

	-	2020	2019
	NOTE	US\$M	US\$M
Gross earned premium revenue			
Reinsurance business earned		2,338	2,127
Other revenue			
Reinsurance and other recoveries revenue	2.2	1,393	574
Reinsurance commission revenue		53	39
		3,784	2,740

#### How we account for the numbers

#### Premium revenue

Premium written comprises inwards reinsurance amounts charged to the reinsured, excluding taxes collected on behalf of third parties. Premium is recognised as revenue in profit or loss based on the incidence of the pattern of risk associated with the reinsurance policy. The earned portion of premium on unclosed business, being business that is written at the balance date but for which detailed policy information is not yet booked, is also included in premium revenue.

#### Reinsurance and other recoveries

Reinsurance and other recoveries on paid claims, reported claims not yet paid, claims incurred but not reported (IBNR), and claims incurred but not enough reported (IBNER) are recognised as revenue. Recoveries are measured as the present value of the expected future receipts.

FOR THE PERIOD ENDED 31 DECEMBER 2020

#### 2.2 Net claims expense

#### **Overview**

The largest expense for the Company and its subsidiaries is net claims expense, which is the difference between the net outstanding claims liability (as described in note 2.3 below) at the beginning and the end of the financial year plus any claims payments made net of reinsurance and other recoveries received during the financial year.

	NOTE	2020 US\$M	2019 US\$M
Gross Claims and related expenses		2,940	1,750
Reinsurance and other recoveries revenue		1,393	574
Net claims expense	2.4.1	1,547	1,176
Analysed as follows:			
Movement in net discounted central estimate	2.4.2	1,551	1,166
Movement in risk margin		(4)	10
Net claims expense		1,547	1,176

#### 2.3 Net outstanding claims liability

#### **Overview**

The net outstanding claims liability comprises the elements described below.

- The gross discounted central estimate (note 2.3.1). This is the present value of the expected future claims payments and includes claims reported but not yet paid, claims incurred but which have not yet been reported (IBNR), claims incurred but not enough reported (IBNER) and estimated claims handling costs.
- Less reinsurance and other recoveries (note 2.3.2). The Company purchases reinsurance to manage its exposure to any one claim or series of claims. When it incurs a claim as a result of an insured loss, it may be able to recover some of that claim from reinsurance. It includes an allowance for IBNR on these reinsurances to the extent that IBNR on gross claims would trigger a recovery.
- The net central estimate (gross central estimate less reinsurance and other recoveries) is discounted to present value recognising that the claim and/or recovery may not be settled for some time. The weighted average risk-free rate for each operating segment are summarised in note 2.3.4.
- Plus a risk margin (note 2.3.3). A risk margin is added to reflect the inherent uncertainty in the net discounted central
  estimate of outstanding claims.

	NOTE	2020 US\$M	2019 US\$M
Gross discounted central estimate	2.3.1	5,926	4,518
Risk margin	2.3.3	314	322
Gross outstanding claims liability		6,240	4,840
Reinsurance and other recoveries on outstanding claims	2.3.2	(3,507)	(2,753)
Net outstanding claims liability		2,733	2,087

FOR THE PERIOD ENDED 31 DECEMBER 2020

The table below analyses the movement in the net outstanding claims liability, showing separately the movement in gross claims liability and the impact of reinsurance.

	-		2020			2019	
		GROSS	REINSURANCE	NET	GROSS	REINSURANCE	NET
	NOTE	US\$M	US\$M	US\$M	US\$M	US\$M	US\$M
At 1 January		4,840	(2,753)	2,087	4,964	(2,880)	2,084

At 31 December		6,240	(3,507)	2,733	4,840	(2,753)	2,087

#### 2.3.1 Gross discounted central estimate

	NOTE	2020 US\$M	2019 US\$M
Gross undiscounted central estimate excluding claims settlement costs <sup>1</sup>		6,017	4,751
Claims settlement costs		1	1
Gross undiscounted central estimate		6,018	4,752
Discount to present value		(92)	(234)
Gross discounted central estimate	2.3	5,926	4,518
Payable within 12 months		2,056	1,428
Payable in greater than 12 months		3,870	3,090
Gross discounted central estimate	2.3	5,926	4,518

<sup>1</sup> At 31 December 2020 the Company had issued, in its own name and through QBE Group, letters of credit and trusts totalling \$1,440 million (2019 \$2,010 million) for the benefit of various ceding entities.

#### Critical accounting judgements and estimates

The gross discounted central estimate is the present value of the expected future payments for claims incurred and includes reported but unpaid claims, IBNR, IBNER and claims handling costs. The central estimate is determined by the VP, Actuarial Reserving & Capital, supported by a team of actuaries and with input from peers in other QBE divisions and QBE Group head office. The valuation process is performed quarterly and includes extensive consultation with claims and underwriting staff as well as senior management. The central estimate of outstanding claims is subject to a comprehensive independent review at least annually. The risk management procedures related to the actuarial function are explained further in note 4.2.

The determination of the amounts that the Company will ultimately pay for claims arising under inward reinsurance contracts involves a number of critical assumptions. Some of the uncertainties impacting these assumptions are as follows:

- changes in patterns of claims incidence, reporting and payment;
- volatility in the estimation of future costs for long tail insurance classes due to the longer period of time that can elapse before a claim is paid in full;
- the existence of complex underlying exposures;
- the incidence of catastrophic events close to the balance sheet date;
- changes in the legal environment, including the interpretation of liability laws and the quantum of damages;
- changing social, political and economic trends for example price and wage inflation; and
- impact of COVID-19 as described in note 1.2.3.

The estimation of IBNR and IBNER is generally subject to a greater degree of uncertainty than the estimation of the cost of settling claims already reported to the Company but not yet paid, for which more information about the claims is generally available. The notification and settlement of claims relating to liability and other long tail classes of business may not happen for many years after the event giving rise to the claim. As a consequence, liability and other long tail classes typically display greater variability between initial estimates and final settlement due to delays in reporting claims and uncertainty in respect of court awards and future claims inflation. Claims in respect of property and other short tail classes are typically reported and settled soon after the claim event, giving rise to more certainty.

Central estimates for each class of business are determined using a variety of estimation techniques, generally based on an analysis of historical experience and with reference to external benchmarks where relevant. The gross central estimate is discounted to present value using the appropriate risk-free rate.

Central estimates are calculated gross of any reinsurance and other recoveries. A separate estimate is made of the amounts recoverable from reinsurers based on the gross central estimate (note 2.3.2).

FOR THE PERIOD ENDED 31 DECEMBER 2020

#### 2.3.2 Reinsurance and other recoveries on outstanding claims

	NOTE	2020 US\$M	2019 US\$M
Reinsurance and other recoveries on outstanding claims – undiscounted <sup>1</sup>		3,541	2,875
Discount to present value		(34)	(122)
Reinsurance and other recoveries on outstanding claims	2.3	3,507	2,753
Receivable within 12 months		1,360	823
Receivable in greater than 12 months		2,147	1,930
Reinsurance and other recoveries on outstanding claims	2.3	3,507	2,753

<sup>1</sup> Net of a provision for impairment of \$7.5 million (2019 \$3.2 million)

#### How we account for the numbers

The recoverability of amounts due from reinsurers is assessed at each balance date to ensure that the balances properly reflect the amounts that are ultimately expected to be received, taking into account counterparty credit risk and the contractual terms of the reinsurance contract. Counterparty credit risk in relation to reinsurance assets is considered in note 4.3. Recoveries are discounted to present value using the appropriate risk-free rate.

#### 2.3.3 Risk margin

#### **Overview**

A risk margin is determined by the Company's Board to account for the inherent uncertainty in the net discounted central estimate.

The risk margin and the net discounted central estimate are key inputs in the determination of the probability of adequacy, which is a statistical measure of the relative adequacy of the outstanding claims liability to ultimately be able to pay claims. For example, a 90% probability of adequacy indicates that the outstanding claims liability is expected to be adequate nine years in 10.

	-	2020	2019
Risk margin	US\$M	314	322
Risk margin as a percentage of the net discounted central estimate	%	13.0	18.2
Probability of adequacy <sup>1</sup>	%	88.8	94.3

<sup>1</sup> The approach to determine the probability of adequacy of the outstanding claims liabilities is consistent with previous years. This said, as explained in note 1.2.3, given the evolving impact of COVID-19, there is a greater level of uncertainty in the level of reserves.

#### How we account for the numbers

AASB 1023 General Insurance Contracts requires an entity to adopt an appropriate risk margin. The resulting probability of adequacy is not of itself an accounting policy as defined by AASB 108 Accounting Policies, Changes in Accounting Estimates and Errors. The appropriate level of risk margin is not determined by reference to a fixed probability of adequacy.

The Company reviews a number of factors when determining the appropriate risk margin, including any changes in the level of uncertainty in the net discounted central estimate, the resulting probability of adequacy and the risk margin as a percentage of the net discounted central estimate.

FOR THE PERIOD ENDED 31 DECEMBER 2020

#### Critical accounting judgements and estimates

The risk margin is determined by the Board and is held to mitigate the potential for uncertainty in the net discounted central estimate. The determination of the appropriate level of risk margin takes into account similar factors to those used to determine the central estimate, such as:

- mix of business, in particular the mix of short tail and long tail business and the overall weighted average term to settlement: and
- the level of uncertainty in the central estimate due to estimation error, data quality, variability of key inflation assumptions and possible economic and legislative changes.

The variability by class of business is measured using techniques that determine a range of possible outcomes of ultimate payments and assign a likelihood to outcomes at different levels. These techniques generally use standard statistical distributions, and the measure of variability is referred to as the coefficient of variation.

At a fixed probability of adequacy, the appropriate risk margin for two or more classes of business or for two or more geographic locations combined is likely to be less than the sum of the risk margins for the individual classes. This reflects the benefit of diversification in reinsurance. The statistical measure used to determine diversification is called the correlation. The higher the correlation between two classes of business, the more likely it is that a negative outcome in one class will correspond to a negative outcome in the other class. For example, high correlation exists between classes of business affected by court cases involving bodily injury claims such as motor third party liability, workers' compensation and public liability, particularly in the same jurisdiction.

The probability of adequacy for the Company is determined by analysing the variability of each class of business and the correlation between classes of business and geographic locations. Correlations are determined for aggregations of classes of business, where appropriate. The correlations adopted by the Company are generally derived from industry analysis, the Company's (and QBE Group trends as appropriate) historical experience and the judgement of experienced and qualified actuaries.

#### 2.3.4 Discount rate used to determine the outstanding claims liability

#### **Overview**

Claims in relation to long tail classes of business (e.g. professional indemnity and workers' compensation) typically may not settle for many years. As such, the liability is discounted to reflect the time value of money. The table below summarises the weighted average discount rates utilised for each operating segment.

	2020 %	2019 %
North America	(0.75) - 0.90	(0.48) - 2.20
International	(0.70) - 0.69	(0.42) - 2.80
Australia Pacific	(0.14) - 2.63	0.56 - 2.63
Latin America	0.39 - 0.39	(0.35) - 2.66
All Segments	(0.70) - 0.98	(0.41) - 2.18

#### How we account for the numbers

AASB 1023 General Insurance Contracts requires that the net central estimate is discounted to reflect the time value of money using risk-free rates that are based on current observable, objective rates that relate to the nature, structure and terms of the future obligations.

FOR THE PERIOD ENDED 31 DECEMBER 2020

#### 2.3.5 Weighted average term to settlement

#### **Overview**

The weighted average term to settlement refers to the period from the balance date to the expected date of claims settlement. All other factors being equal, a longer weighted average term to settlement generally results in a larger benefit from discount and a resulting lower net discounted central estimate.

	2020 YEARS								2019 YEAF			
	US\$	£	A\$	€	OTHER	TOTAL	US\$	£	A\$	€	OTHER	TOTAL

#### 2.3.6 Net discounted central estimate maturity profile

#### **Overview**

The maturity profile is the Company's expectation of the period over which the net central estimate will be settled. The Company uses this information to ensure that it has adequate liquidity to pay claims as they are due to be settled and to inform the Company's investment strategy. The expected maturity profile of the Company's net discounted central estimate is analysed below.

2020	LESS THAN ONE YEAR US\$M	13 TO 24 MONTHS US\$M	25 TO 36 MONTHS US\$M	37 TO 48 MONTHS US\$M	49 TO 60 MONTHS US\$M	OVER 5 YEARS US\$M	TOTAL US\$M

#### 2.3.7 Impact of changes in key variables on the net outstanding claims liability

#### **Overview**

The impact of changes in key variables used in the calculation of the outstanding claims liability is summarised in the table below. Each change has been calculated in isolation from the other changes and shows the after tax impact on profit or loss assuming that there is no change to any of the other variables. In practice, this is considered unlikely to occur as, for example, an increase in interest rates is normally associated with an increase in the rate of inflation. Over the medium to longer term, the impact of a change in discount rates is expected to be largely offset by the impact of a change in the rate of inflation.

The sensitivities below assume that all changes directly impact profit after tax. If the central estimate was to increase, it is possible that part of the increase may result in an offsetting change in the level of risk margin required rather than in a change to profit after tax, depending on the nature of the change in the central estimate and risk outlook. Likewise, if the coefficient of variation were to increase, it is possible that the probability of adequacy would reduce from its current level rather than result in a change to net profit after income tax.

		PROFIT	(LOSS) 1
	SENSITIVITY	2020	2019
	%	US\$M	US\$M
Net discounted central estimate	+5	(96)	(70)
	-5	96	70
Risk margin	+5	(12)	(13)
	-5	12	13
Inflation rate	+0.5	(30)	(23)
	-0.5	28	22
Discount rate	+0.5	28	22
	-0.5	(30)	(23)
Coefficient of variation	+1	(19)	(23)

	-1	12	15
Weighted average term to settlement	+10	4	8
	-10	(4)	(8)

<sup>1</sup> The impact of a change in interest rates on net profit after income tax due to market value movements on fixed interest securities is shown in note 4.4.

FOR THE PERIOD ENDED 31 DECEMBER 2020

#### 2.4 Claims development – net undiscounted central estimate

#### **Overview**

The claims development table demonstrates the extent to which the original estimate of net ultimate claims payments in any one accident year (item (a) in the table below) has subsequently developed favourably (i.e. claims cost estimates have reduced) or unfavourably (i.e. further claims expense has been recognised in subsequent years). This table therefore illustrates the variability and inherent uncertainty in estimating the central estimate each year. The ultimate claims cost for any particular accident year is not known until all claims payments have been made which, for some long tail classes of business, could be many years into the future. The estimated ultimate claims payments at the end of each subsequent accident year demonstrates how the original estimate has been revised over time (b).

Cumulative net claims payments (d) are deducted from the estimate of net ultimate claims payments in each accident year (c) at the current balance date, resulting in the undiscounted central estimate at a fixed rate of exchange (e). This is revalued to the balance date rate of exchange (f) to report the net undiscounted central estimate (g), which is reconciled to the discounted net outstanding claims liability (h). The treatment of foreign exchange in the claims development table is explained on the following page.

The net increase (decrease) in estimated net ultimate claims payments (i) reflects the estimated ultimate net claims payments at the end of the current financial year (c) less the equivalent at the end of the previous financial year (b). This is further summarised in note 2.4.1. The claims development table is presented net of reinsurance.

<sup>1</sup> Excludes claims settlement costs

FOR THE PERIOD ENDED 31 DECEMBER 2020

#### How we account for the numbers

The estimate of net ultimate claims payments attributable to business acquired is generally included in the claims development table in the accident year in which the acquisition was made. This includes the acquisition of net outstanding claims liabilities via loss portfolio transfers.

The Company writes business in currencies other than the US dollar. The translation of ultimate claims estimates denominated in foreign currencies gives rise to foreign exchange movements which have no direct bearing on the development of the underlying claims. To eliminate this distortion, amounts have been translated to the functional currencies of our segment ledgers at constant rates of exchange. All estimates of ultimate claims payments for the 10 most recent accident years reported in ledger currencies other than US dollars have been translated to US dollars using the 2020 average rate of exchange.

#### 2.4.1 Reconciliation of claims development table to profit or loss

#### **Overview**

The table below reconciles the net increase or decrease in estimated net ultimate claims payments in the current financial year from the claims development table (item (i) in note 2.4) to the analysis of current and prior accident year central estimate development recognised in profit or loss (note 2.4.2).

	2020				2019

#### 2.5 Unearned premium and deferred insurance costs

#### **Overview**

#### **Unearned premium**

Gross written premium is earned in profit or loss in accordance with the pattern of incidence of risk of the related business. The unearned premium liability is that portion of gross written premium that the Company has not yet recognised in profit or loss as it represents insurance coverage to be provided by the Company after the balance sheet date.

#### **Deferred insurance costs**

Premium ceded to reinsurers by the Company in exchange for reinsurance protection is expensed in profit or loss in accordance with the reinsurance contract's expected pattern of incidence of risk. The deferred reinsurance premium asset is that portion of the reinsurance premium that the Company has not yet recognised in profit or loss as it represents reinsurance coverage to be received after the balance sheet date.

Acquisition costs are the costs associated with obtaining and recording insurance business. Acquisition costs are similarly capitalised and amortised, consistent with the earning of the related premium for that business. Commissions are a type of acquisition cost but are disclosed separately.

Summary of unearned premium and deferred insurance costs balances

	2020 US\$M	2019 US\$M
Unearned premium (a)	741	698
To be earned within 12 months	741	698
Unearned premium	741	698
Deferred reinsurance premium	191	174
Deferred net commission	141	150
Deferred insurance costs (b)	332	324
To be expensed within 12 months	284	308
To be expensed in greater than 12 months	48	16
Deferred insurance costs	332	324
Net premium liabilities (a) – (b)	409	374

#### Unearned premium movements

Transfers to assets or liabilities held for sale / disposal				4
Foreign exchange	_	_	(4)	(21)
At 31 December	191	174	141	150

FOR THE PERIOD ENDED 31 DECEMBER 2020

#### How we account for the numbers

#### **Unearned premium**

Unearned premium is calculated based on the coverage period of the reinsurance contract and in accordance with the expected pattern of the incidence of risk, using either the daily pro-rate method or the 24ths method, adjusted where appropriate to reflect different risk patterns.

#### **Deferred insurance costs**

Deferred reinsurance premium is calculated based on the period of indemnity provided to the Company by the reinsurance contract and in accordance with the related pattern of the incidence of risk.

Acquisition costs are capitalised when they relate to new business or the renewal of existing business and are amortised on the same basis as the earning pattern for that business. At the balance sheet date, deferred acquisition costs represent the capitalised acquisition costs that relate to unearned premium and are carried forward to a subsequent accounting period in recognition of their future benefit. The carrying value of deferred acquisition costs is subject to impairment testing in the form of the liability adequacy test (note 2.5.1).

Due to the captive nature of the Company, there are generally no external costs incurred in the acquisition of business. The only costs relating to acquired business are those of the small underwriting function. As these costs are expensed through-out the year, in a manner that largely matches premium recognition, and are relatively consistent year on year, management consider it appropriate to expense these costs as incurred rather than deferring any portion.

#### 2.5.1 Liability adequacy test

#### **Overview**

At each balance sheet date, the Company is required to assess net premium liabilities (being unearned premium less deferred insurance costs) to determine whether the amount provided is sufficient to pay future claims net of reinsurance recoveries.

If the present value of expected future net claims including a risk margin exceeds the net premium liabilities, adjusted for deferred reinsurance premium relating to future business not yet written, the net premium liability is deemed deficient. This deficiency is immediately recognised in profit or loss. In recognising the deficiency, an insurer must first write down any related intangible assets and then deferred acquisition costs before recognising an unexpired risk liability.

Expected present value of future cash flows for future claims including risk margin

	2020 US\$M	2019 US\$M
Undiscounted net central estimate	354	413
Discount to present value	(6)	(22)
	348	391
Risk margin at the 75th percentile of insurance liabilities	34	35
Expected present value of future cash flows for future claims including risk margin	382	426

The application of the liability adequacy test did not identify a deficiency at 31 December 2020 (2019 nil).

#### How we account for the numbers

At each balance sheet date, the adequacy of the unearned premium liability is assessed on a net of reinsurance basis against the present value of the expected future claims cash flows in respect of the relevant insurance contracts, plus an additional risk margin to reflect the inherent uncertainty of the central estimate. The assessment is carried out at an overall company level.

FOR THE PERIOD ENDED 31 DECEMBER 2020

#### Critical accounting judgements and estimates

In assessing the adequacy of net premium liabilities, AASB 1023 *General Insurance Contracts* requires the inclusion of a risk margin but does not prescribe a minimum level of margin. Whilst there is established practice in the calculation of the probability of adequacy of the outstanding claims liability, no such guidance exists in respect of the level of risk margin to be used in determining the adequacy of net premium liabilities.

The Company has adopted a risk margin of 9.6% (2019 8.9%) for the purpose of the liability adequacy test to produce a 75% probability of adequacy in respect of total insurance liabilities. The 75% basis is a recognised industry benchmark in Australia, being the minimum probability of adequacy required for Australian licensed insurers by APRA. The Company's ultimate parent undertaking is domiciled in Australia.

#### 2.6 Trade and other receivables

#### **Overview**

Trade and other receivables are principally amounts owed to the Company by policyholders or reinsurance counterparties. Unclosed premium receivables are estimated amounts due to the Company in relation to business for which the Company is on risk but where the policy is not billed to the counterparty at the balance sheet date.

	2020 US\$M	2019 US\$M
Trade debtors		
Premium receivable <sup>1</sup>	480	419
Reinsurance and other recoveries <sup>2</sup>	293	193
Unclosed premium	210	80
	983	692
Amounts due from related entities <sup>3</sup>	631	678
Other receivables	12	16
Trade and other receivables	1,626	1,386
Receivable within 12 months	1,601	1,367
Receivable in greater than 12 months	25	19
Trade and other receivables	1,626	1,386

- 1 Net of a provision for impairment of \$nil (2019 nil)
- 2 Net of a provision for impairment of 7.5 million (2019 \$3.2 million)
- 3 Included in amounts due from related entities are three loans totalling \$630 million (2019 \$583 million) to QBE Strategic Capital (Europe) Limited, on commercial terms. All three loans with QBE Strategic Capital (Europe) Limited have been rolled until 7 December 2021 with an all in interest rate of 0.920% (2 loans totaling \$530 million) and 1.149% (\$100 million loan) to 11 June 2021 and 0.930% (\$530 million loans) and 1.156% (\$100 million loan) from 12 June 2021 to 7 December 2021.

Due to the predominantly short-term nature of these receivables, the carrying value is assumed to approximate the fair value.

The maximum exposure to credit risk at the reporting date is the fair value of each class of receivables. As at 31 December 2020, no receivables are pledged by the Company as collateral for liabilities. Information on the ageing and credit rating of these balances is included in note 4.3.

#### How we account for the numbers

Receivables are recognised at fair value and are subsequently measured at amortised cost less any impairment.

Receivables arising from general insurance contracts, which include premium receivable, reinsurance and other recoveries and unclosed premium, are impaired when there is objective evidence that the Company will not be able to collect all

FOR THE PERIOD ENDED 31 DECEMBER 2020

amounts due according to the original terms of the receivable.

The remainder of the Company's receivables are assessed for impairment based on both incurred and expected credit losses, the impacts of which are not material.

#### 2.7 Trade and other payables

#### **Overview**

Trade payables primarily comprise amounts owed to reinsurance counterparties and cedants. Treasury and investment payables are amounts due to counterparties in settlement of treasury and investment transactions.

	2020 US\$M	2019 US\$M
Trade payables	576	653
Other payables and accrued expenses	4	6
Investment payables	_	139
Amounts due to related entities <sup>1</sup>	176	237
Trade and other payables	756	1,035
Payable within 12 months	579	857
Payable in greater than 12 months	177	178
Trade and other payables	756	1,035

<sup>1</sup> Included in Amounts due to related entities is a loan of \$175 million (2019 \$175 million), plus accrued interest thereon of \$1 million (2019 \$3 million), issued on commercial terms to QBE Strategic Capital Company Pty Limited.

#### How we account for the numbers

Trade payables are recognised at their fair value.

FOR THE PERIOD ENDED 31 DECEMBER 2020

#### 3. INVESTMENT ACTIVITIES

#### **Overview**

Premiums collected from policyholders are invested to meet the Company's cash flow needs to pay claims and other expenses, as well as generating a return that contributes to the Company's profitability. A sound investment strategy is therefore integral to the success of the Company's operations.

The Company invests across a diversified range of instruments to achieve an appropriate balance between risk and return. Decisions on where to invest is dependent on expected returns, cash flow requirements of the Company, liquidity of the instrument, credit quality of the instrument and the Company's overall risk appetite. Further details on the management of risk associated with investment assets can be found in note 4.

The Company's investment assets are categorised as either backing policyholders' or shareholders' funds, with the former being investment assets which back insurance liabilities whilst the latter comprises all other investment assets.

#### 3.1 Investment income

	2020	2019
	US\$M	US\$M
Income on fixed interest securities, short-term money and cash 1	81	142
(Loss) income on growth assets	(11)	37
Gain on other financial assets	313	92
Gross investment income <sup>2</sup>	383	271
Investment expenses	(3)	(2)
Net investment income	380	269
Foreign exchange loss	(8)	-
Other expenses	(4)	(2)
Total investment income	368	267
Investment and other income – policyholders' funds	351	205
Investment expenses – policyholders' funds	(2)	(1)
Investment and other income – shareholders' funds	20	64
Investment expenses – shareholders' funds	(1)	(1)
Total investment income	368	267

<sup>1</sup> Includes interest income of \$7 million (2019 \$15 million) on related party corporate bonds held within its investment portfolio until they were exited during the year.

#### How we account for the numbers

Interest income is recognised in the period in which it is earned. Dividends are recognised when the right to receive payment is established. Investment income includes realised and unrealised gains or losses on financial assets which are reported on a combined basis as fair value gains or losses on financial assets.

<sup>2</sup> Includes investment income of \$61 million (2019 \$88 million), dividend income of \$17 million (2019 \$21 million) and gain related to other financial assets held at fair value through profit and loss of \$313 million (2019 \$92 million) and as described in note 3.2.1, net of net fair value losses of \$8 million (2019 \$70 million gain).

FOR THE PERIOD ENDED 31 DECEMBER 2020

#### 3.2 Investment assets

	2020	2019
	US\$M	US\$M
Fixed income		
Short-term money	291	140
Government bonds	245	574
Corporate bonds	1,747	1,566
Infrastructure debt	15	22
	2,298	2,302
Growth assets	•	•
Developed market equity	_	22
Emerging market equity	_	9
Emerging market debt	_	69
High yield debt	_	47
Unlisted property trusts	44	38
Infrastructure assets	271	268
Private equity	65	52
· ·	380	505
Other financial assets	428	115
Total investments	3,106	2,922
Amounts maturing within 12 months	990	629
Amounts maturing in greater than 12 months	2,116	2,293
Total investments	3,106	2,922

#### How we account for the numbers

Investments are designated at fair value through profit or loss. They are initially recognised at the cost of acquisition excluding transaction costs and are subsequently remeasured to fair value at each reporting date. The fair value hierarchy and the Company's approach to measuring the fair value of each investment instrument is disclosed in note 3.2.1.

All purchases and sales of investments that require delivery of the asset within the timeframe established by regulation or market convention are recognised at trade date, being the date on which the Company commits to buy or sell the asset. Investments are derecognised when the right to receive future cash flows from the asset has expired or has been transferred and the Company has transferred substantially all the risks and rewards of ownership.

#### **Group Aggregate Risk Cover**

In 2016, Equator Re entered into agreements with each QBE division, whereby the divisions reassigned their rights to recoveries under the external Group Aggregate Risk (GAR) reinsurance program, across underwriting years with effective dates 1 January 2011 through 2014, to Equator Re. In exchange for this reassignment of recoveries, Equator Re paid cash to each division, equivalent to the discounted central estimate of their share of the GAR recovery at the date of the rights reassignment.

The amount recognised as other financial assets represents the portion of the GAR asset that does not directly relate to the underwriting activities of Equator Re and henceforth any gain or loss on the asset (relating to divisional claims experience) is recognised in the statement of comprehensive income as investment and other income related to shareholder funds.

The asset is classified as a 'financial asset held at fair value through profit and loss' according to AASB 9.

#### Top, Wrap and Aggregate Cover and Group Risk XOL Clash Cover

In 2020, the Company assumed gross outstanding claims provisions from the divisions which contribute to the Top, Wrap and Aggregate Cover (TWA) and Group Risk XOL Clash Cover (Clash) recoveries. However, each of the divisions also retained losses under the Group internal covers attachment points which are also picked up by the TWA and Clash cover but recovered by the Company.

The TWA and Clash recovery assets have been split into the share that relates to the Company's claims and the portion that relates to the claims retained in the divisions. The Company's share of the recoveries are accounted for as a reinsurance asset. The divisional portions of the TWA and Clash recoveries are reported as a financial asset rather than a reinsurance asset. This is because the asset value is based on divisional claims, which have no impact on the Company's underwriting profit and loss or balance sheet.

The asset is classified as a 'financial asset held at fair value through profit and loss' according to AASB 9.

FOR THE PERIOD ENDED 31 DECEMBER 2020

#### 3.2.1 Fair value hierarchy

#### **Overview**

The Company's Board Risk and Capital Committee is responsible for the governance and oversight of the investment valuation process. The fair value of investments is determined in accordance with the Company's investment valuation policy. This Board committee reviews the advice and recommendation of the Management Investment Committee.

The investments of the Company are disclosed in the table below using a fair value hierarchy which reflects the significance of inputs into the determination of fair value as follows:

Level 1: Valuation is based on quoted prices in active markets for the same instruments.

**Level 2:** Valuation is based on quoted prices for identical instruments in markets which are not active, quoted prices for similar instruments, or valuation techniques for which all significant inputs are based on observable market data, for example, consensus pricing using broker quotes or valuation models with observable inputs.

Level 3: Valuation techniques are applied in which one or more significant inputs are not based on observable market data.

	2020				20	19		
	LEVEL 1 US\$M	LEVEL 2 US\$M	LEVEL 3 US\$M	TOTAL US\$M	LEVEL 1 US\$M	LEVEL 2 US\$M	LEVEL 3 US\$M	TOTAL US\$M
Fixed income								
Short-term money	1	290	_	291	140	_	_	140
Government bonds	123	122	_	245	476	98	_	574
Corporate bonds	_	1,747	_	1,747	_	1,566	_	1,566
Infrastructure debt	_	· -	15	15	_	_	22	22
	124	2,159	15	2,298	616	1,664	22	2,302
Growth assets				·				
Developed market equity	_	_	_	_	22	_	_	22
Emerging market equity	_	_	_	_	9	_	_	9
Emerging market debt	_	_	_	_	69	_	_	69
High yield debt	_	_	_	_	47	_	_	47
Unlisted property trusts	_	_	44	44	_	38	_	38
Infrastructure assets	_	_	271	271	_	_	268	268
Private equity	_	_	65	65	_	_	52	52
	_	_	380	380	147	38	320	505
Other financial assets	_	_	428	428	_	_	115	115
Total investments	124	2,159	823	3,106	763	1,702	457	2,922

The Company's approach to measuring the fair value of investments is described below:

#### **Short-term money**

Term deposits are valued at par plus accrued interest and are classified as level 1 fair value instruments. Other short-term money (bank bills, certificates of deposit, treasury bills and other short-term instruments) is priced using interest rates and yield curves observable at commonly quoted intervals.

#### Government bonds and corporate bonds

Bonds which are traded in active markets and have quoted prices from external data providers are classified as level 1 fair value instruments. Bonds which are not traded in active markets are priced using broker quotes, using comparable prices for similar instruments or using pricing techniques set by local regulators or exchanges.

#### Infrastructure debt

Infrastructure debt prices are sourced from the investment manager who may use a combination of observable market prices or comparable market prices where available and other valuation techniques. When valuation techniques require the use of significant unobservable inputs, these assets have been classified as level 3.

#### **Developed market equity**

Listed equities traded in active markets are valued by reference to quoted bid prices. Unlisted equities are priced using the Company's share of the net assets of the entity.

#### Emerging market equity, emerging market debt, high yield debt, unlisted property trusts and infrastructure assets

These assets are valued using quoted bid prices in active markets or current unit prices as advised by the responsible entity, trustee or equivalent of the investment management scheme.

FOR THE PERIOD ENDED 31 DECEMBER 2020

#### **Private equity**

Alternatives comprise fund of funds vehicles. Fair value is based on the net asset value of the vehicle, and the responsibility for the valuation of the underlying securities lies with the external fund manager. In most cases, an independent administrator will be utilised by the external fund manager for pricing and valuation. A combination of observable market prices or comparable market prices (where available) and other valuation techniques may be used in the determination of fair value.

#### Other financial assets

The financial asset is not actively traded and therefore no external price or benchmark exists. It is valued using commonly accepted actuarial valuation techniques taking into consideration the value of the underlying assets upon which the financial asset is based, and the expected timing of future cashflows relating to this asset.

#### Movements in level 3 investments

The following table provides an analysis of investments valued with reference to level 3 inputs.

	2020	2019
LEVEL 3	US\$M	US\$M
At 1 January	458	401
Level 3 investments of subsidiary at acquisition	_	-
Purchases	11	28
Disposals	(17)	(73)
Reclassification into level 3	44	_
Fair value movement recognised in profit or loss	317	105
Foreign exchange	10	(3)
At 31 December	823	458

#### 3.2.2 Charges over investments and restrictions on use

Included in investments are amounts totalling \$1,576 million (2019 \$567 million) which are held in portfolio trust funds for the benefit of various QBE ceding affiliates. These funds can only be used to settle such recoverable amounts and amounts cannot be withdrawn from the funds without the permission of the respective QBE ceding affiliate.

FOR THE PERIOD ENDED 31 DECEMBER 2020

#### 4. RISK MANAGEMENT

#### **Overview**

The Company is in the business of managing risk. The Company's ability to satisfy policyholder needs is central to what we do. The Company aims to generate wealth and maximise returns for its shareholder by pursuing opportunities that involve risk. Our people are responsible for ensuring that the Company's risks are identified, managed and controlled on a day to day basis. The Company aims to understand and manage its risk in order to provide increased certainty and improved outcomes for all stakeholders.

The Company employs QBE's consistent and integrated approach to Enterprise Risk Management (ERM). QBE's global risk management framework sets out the approach to managing key risks and delivering strategic objectives whilst taking into account the creation of value for shareholders. QBE's risk management framework is articulated in QBE Group Risk Management Strategy (RMS) and Reinsurance Management Strategy (ReMS), both of which are approved annually by the QBE Group Board and lodged with APRA.

The ERM framework consists of complementary elements that are embedded throughout the business management cycle and culture of the organisation. Key aspects include: risk appetite, governance, reporting, risk identification and measurement, modelling and stress testing, risk systems, and risk culture.

Risk Management is a continuous process and an integral part of robust business management. The Company's approach is to integrate risk management into the broader management processes of the organisation. Specifically, the management of risk must occur at each point in the business management cycle.

The Company's strategy for managing risk is to:

- achieve competitive advantage by better understanding the risk environments in which we operate;
- operate within our stated risk appetites and effectively allocate capital and resources by assessing the balance of risk and reward;
- avoid unwelcome surprises to the achievement of business objectives by reducing uncertainty and volatility through the identification and management of risks.

The framework is supported by a suite of risk policies that detail the Company's approach to the following key risk categories used by the Company to classify risk:

- Strategic risk (note 4.1)
- Insurance risk (note 4.2)
- Credit risk (note 4.3)
- Market risk (note 4.4)
- Liquidity risk (note 4.5)
- Operational risk (note 4.6)
- Compliance risk (note 4.7)
- Group risk (note 4.8)

FOR THE PERIOD ENDED 31 DECEMBER 2020

#### 4.1 Strategic risk

#### **Overview**

Strategic risk is the current and prospective impact on earnings and/or capital as a result of strategic business decisions or responsiveness to external change. The Company classifies strategic risk into six subcategories, as follows:

- Performance risk: The Company is not able to achieve its performance objectives
- Capital risk: The Company's structure and availability of capital does not meet regulatory requirements and/or support strategic initiatives.
- Reputational risk: The Company's stakeholders have a negative perception of the Company's brand which may
  damage the Company's reputation and threaten overall performance.
- Environmental, Social and Governance (ESG) risk: Negative impact to the Company's strategic priorities or objectives by environmental, social or governance issues.
- Emerging risk: New or future risks which are difficult to assess but may have a significant impact to the Company or the markets it operates in.
- Risk culture: the norms of behaviour within the Company that determine the organisations ability to understand, discuss and act on current and future risks.

The Company's approach to managing strategic risk is underpinned by the Company's strategic risk appetite statement as set by the Board and is summarised below.

#### Performance risk

Failure to deliver acceptable performance can result in stakeholders losing confidence in the Company, impacting our reputation and ultimately impacting our ability to deliver our strategic objectives.

The Company monitors performance risk by assessing changing levels of risk in the business plan, and taking action accordingly prior to signing-off the plan.

#### Capital risk

The Company's objective when managing capital is to maintain an optimal capital structure to generate an acceptable return on capital whilst meeting capital adequacy requirements, providing security for policyholders and continuing to provide returns to its shareholder.

Where appropriate, adjustments are made to capital levels in light of changes in economic conditions and risk characteristics of the Company. In order to maintain or adjust the capital structure, the Company has the option to adjust the amount of dividends paid to the shareholder, return capital or issue new shares.

The Company uses an economic capital model (ECM) to assess the level of capital required for the underwriting, claims estimation, credit, market, liquidity and operational risk to which it is exposed. Economic capital is determined as the level of capital that the Company needs to ensure that it can, with a pre-specified probability, satisfy its ultimate policyholder obligations in relation to all reinsurance contracts issued on or before the end of the business plan year. The ECM is used by management to inform decisions on capital strategy, risk appetites, business planning, reinsurance arrangements, and pricing.

QBE Blue Ocean Re Limited is an Affiliated Class 3A insurer. Equator Reinsurances Limited is a Class 3B insurer. BMA considers the company on a consolidated basis as a Class 3B insurer - subject to certain capital requirements. These requirements are designed to ensure sufficient capital is maintained in order to provide adequate protection for policyholders and maintain Solvency II equivalence. For the current period the Company met the minimum and surplus requirements as prescribed by the BMA. The Company also met minimum liquidity margins.

The Company believes that insurer financial strength ratings provided by the major rating agencies are an important factor in demonstrating the financial strength and claims paying ability. The Company is rated "A+/Stable" by Standard & Poor's and A+, Outlook Negative by Fitch Ratings as at 31 December 2020.

Management monitors and actively manages the Company's capital levels on an ongoing basis. Management has a particular focus on the level of eligible regulatory capital that exceeds the Bermuda Monetary Authority requirements. Having determined that the current risk appetite of the Company remains appropriate, the Board has a target level of regulatory capital of the Bermuda Solvency Capital Requirement (BSCR). As at 31 December 2020, the capital coverage ratio was 159%. On 13 March 2020, the Company issued additional share capital of \$298 million, increasing the capital coverage towards its target level.

The Company has dedicated staff responsible for understanding the regulatory capital requirements of the entity. These staff regularly interact with their global peers through-out QBE to assess the net capital impact of various transactions and reinsurances which the Company provides. The quality of the Company's assets (particularly investments and reinsurance recoveries) are continuously monitored to ensure any potential issues are identified and remedial action, where necessary, is taken to restore effective capital performance and levels

FOR THE PERIOD ENDED 31 DECEMBER 2020

### **Reputation risk**

The Company assesses reputation risk through the quality of the relationships with key stakeholders, including senior stakeholders in QBE Group and the divisions, regulators, government, communities, employees, and third-party partners including suppliers. Each of these relationships is actively managed by the Company through functional teams, which include senior management.

### ESG and emerging risk

QBE Group's ESG risk and emerging risk standards operationalise the Group's approach to managing ESG and emerging risks respectively, including climate change.

Biannual horizon scans are performed on ESG and emerging risks, including assessment of potential financial and reputational impacts to the Group. Risk treatment plans are developed for material risks, which include development of underwriting and investment policy, monitoring frameworks and stress and scenario analysis. ESG and emerging risks are regularly reported to the Group Executive Non-Financial Risk Committee and the Group Board Risk & Capital Committee. Any observations or required actions are fed back to the President via his membership of the QBE Group Underwriting Committee

Climate change is a material business risk for QBE Group, potentially impacting our business and customers in the medium to long term. The business has considered potential short-term scenarios that could affect our insurance business written to date and current investments, and confirmed no material impact on the amounts recognised or disclosed in the financial statements.

### **Risk culture**

Risk culture forms part of the Company's risk management strategy and is a key component of the ERM framework, which outlines how risk culture applies to QBE's people and how it is operationalised across QBE.

QBE is committed to, and supports, a strong risk culture. It recognises the importance of risk awareness and culture as being instrumental in the effectiveness of the ERM framework.

### 4.2 Insurance risk

### **Overview**

Insurance risk is the risk of fluctuations in the timing, frequency and severity of insured events and claims settlements, relative to expectations.

The Company classifies insurance risk into four subcategories, as follows:

- Underwriting/Pricing;
- Insurance concentrations;
- Reserving; and
- Reinsurance.

The Company's approach to managing insurance risk is underpinned by the Company's insurance risk appetite statement as set by the Board and is summarised below.

### **Underwriting/pricing risk**

The Company manages underwriting/pricing risk by appropriately setting and adjusting underwriting strategy, risk selection and pricing practices throughout the underwriting cycle.

The Company's underwriting strategy aims to diversify and limit the aggregation of a single type of reinsurance risk accepted. The underwriting strategy is implemented through QBE's annual business planning process, supported by underwriting standards and delegated authorities. These authorities reflect the level of risk that the Company is prepared to take with respect to each permitted reinsurance class.

Pricing of risks is controlled by the use of in-house pricing models relevant to specific portfolios and the markets in which the Company operates and is supported by external benchmark pricing. Underwriters and actuaries maintain pricing and claims analysis for each portfolio, combined with a knowledge of current developments in the respective markets and classes of business.

One of the core objectives of the Company is to provide the QBE Group with stability in pricing and ease of access to external reinsurance at a more competitive cost, on an aggregate basis, than otherwise available in the local division markets. The Company's underwriting strategy is supportive and linked to the annual divisional business planning process. In addition, the Company responds to ad-hoc or bespoke reinsurance requirements of the various divisions of the QBE Group.

For catastrophe XoL programs, the Company makes use of both proprietary and in-house models to calculate a comprehensive view of loss costs. This exposure based approach is blended with an experience rated approach using an appropriate credibility weighting. For per risk XoL programs, a similar approach is used where industry loss curves are blended with an experience rated approach. For quota

FOR THE PERIOD ENDED 31 DECEMBER 2020

share programs, the historical results are analysed to determine whether the business plan loss ratio and commission rate, yield a sufficient profit margin to service the allocated capital.

### Insurance concentration risk

The Company's exposure to concentrations of reinsurance risk is mitigated by maintaining a business portfolio that is diversified across countries and classes of business. Product diversification is pursued through a strategy of developing strong underwriting skills in a wide variety of classes of business and close partnership with the QBE operating divisions.

The table below demonstrates the diversity of the Company's operations.

	2020	2019
GROSS EARNED PREMIUM	US\$M	US\$M
Property	1,206	1,060
Motor & motor casualty	66	110
Agriculture	22	199
Public/product liability	435	222
Workers' compensation	126	152
Marine, energy & aviation	144	126
Professional indemnity	132	70
Financial & credit	165	148
Accident & health	42	40
	2,338	2,127

Concentration risk includes the risks from natural or man-made events that have the potential to produce claims from multiple policyholders at the same time (e.g. natural catastrophes, industrial accidents, financial downturn, etc.). The Company currently uses a variety of methodologies to monitor aggregates and manage concentration/accumulation risk. These include the use of catastrophe models from third party vendors such as RMS and AIR, the Society of Lloyd's realistic disaster scenarios (RDS) and QBE Group aggregate methodology. The Company sets its risk appetite in accordance with prevailing requirements of the Bermuda Monetary Authority and generally acceptable market practices, in addition to considering the relevance, where applicable, of catastrophe risk according to the QBE Group's risk appetite and APRA (the QBE Group's regulator) insurance concentration risk charge (ICRC).

### **Reserving risk**

Reserving risk is managed through the quarterly actuarial valuation of insurance liabilities. The valuation of the net central estimate is performed by qualified and experienced actuaries, with reference to historical data and reasoned expectations of future events. The central estimate of outstanding claims is subject to a comprehensive independent review at least annually.

### 4.3 Credit risk

### **Overview**

Credit risk is the risk of financial loss where a customer, counterparty or issuer fails to meet their financial obligations to the Company in accordance with agreed terms. The Company's exposure to credit risk arises from financial transactions with securities issuers, debtors, brokers, policyholders, reinsurers and guarantors.

The Company's approach to managing credit risk is underpinned by the Company's credit risk appetite as set by the Board and summarised below.

### Reinsurance credit risk

The Company's objective is to maximise placement of reinsurance with highly rated counterparties. Concentration of risk with reinsurance counterparties is strictly monitored and regularly by the Company's Board and the QBE Group's Security Committee and is controlled by reference to the following protocols:

- treaty or facultative reinsurance is placed in accordance with the requirements of the QBE Group ReMS and QBE Group Security Committee guidelines;
- reinsurance arrangements are regularly reassessed to determine their effectiveness based on current exposures, historical claims and potential future losses based on the Company's inwards reinsurance concentrations; and
- exposure to reinsurance counterparties and the credit quality of those counterparties is actively monitored.

Credit risk exposures are calculated regularly and compared with authorised credit limits. In certain cases, the Company requires letters of credit or other collateral arrangements to be provided to guarantee the recoverability of the amount involved. The Company holds \$1,440 million (2019 \$2,010 million) in collateral to support reinsurance recoveries on outstanding claims. The credit rating analysis below includes the impact of such security arrangements. In some cases, further security has been obtained in the form of trust arrangements, reinsurer default protection and other potential offsets. This additional security has not been included in the credit rating analysis set out below.

FOR THE PERIOD ENDED 31 DECEMBER 2020

The following table provides information about the quality of the Group's credit risk exposure in respect of reinsurance recoveries at the balance date. The analysis classifies the assets according to Standard & Poor's (S&P) counterparty credit ratings. AAA is the highest possible rating. Rated assets falling outside the range of AAA to BBB are classified as speculative grade.

		CREDIT RATING						
	AA	Α	NOT RATED <sup>2</sup>	TOTAL				
	US\$M	US\$M	US\$M	US\$M				
As at 31 December 2020

	2019	159	5	_	14	15	193

### Investment and treasury credit risk

The Company only transacts with investment counterparties within the limits outlined in the delegated authorities' policy. Investment counterparty exposure limits are applied to individual counterparty exposures outside the QBE Group and to multiple exposures within a group of related companies in relation to investments, cash deposits and forward foreign exchange exposures. Counterparty exposure limit compliance is monitored daily.

The following table provides information regarding the Company's aggregate credit risk exposure at the balance date in respect of the major classes of financial assets. Trade and other receivables except balances due from related entities are excluded from this analysis on the basis that they comprise smaller credit risk items which generally cannot be rated and are not individually material. The analysis classifies the assets according to S&P counterparty credit ratings. AAA is the highest possible rating. Rated assets falling outside the range of AAA to BBB are classified as speculative grade.

		CR	EDIT RATING	CREDIT RATING					
	AAA	AA	Α	BBB	TOTAL				
	US\$M	US\$M	US\$M	US\$M	US\$M				
As at 31 December 2020									
Cash and cash equivalents	_	_	308	2	310				
Interest-bearing investments	156	823	973	346	2,298				
Derivative financial instruments	-	_	33	_	33				
Amounts due from related entities	_	_	631	-	631				
As at 31 December 2019									
Cash and cash equivalents	_	2	35	1	38				
Interest-bearing investments	117	828	751	606	2,302				
Derivative financial instruments	_	_	10	_	10				
Amounts due from related entities	_	_	678	_	678				

The carrying amount of the relevant asset classes in the balance sheet represents the maximum amount of credit exposure. The fair value of derivatives shown on the balance sheet represents the current risk exposure but not the maximum risk exposure that could arise in the future as a result of changing values.

### Insurance and other credit risk

As the internal captive reinsurer of the QBE Group, the Company almost always transacts with related entities. The Company regularly reviews the collectability of receivables and the adequacy of associated provisions for impairment. Balances are monitored on the basis of uncollected debt and debt outstanding in excess of six months. Concentration risk is also monitored.

FOR THE PERIOD ENDED 31 DECEMBER 2020

The following table provides information regarding the ageing of the Company's financial assets that are past due but not impaired.

-	-	PAST DUE BUT NOT IMPAIRED						
	NEITHER PAST DUE NOR IMPAIRED US\$M	0 TO 3 MONTHS US\$M	4 TO 6 MONTHS US\$M	7 MONTHS TO 1 YEAR US\$M	GREATER THAN 1 YEAR US\$M	TOTAL US\$M

Amounts due from related entities	678	_	_	_	_	678		
Investment receivables	16	_	_	_	_	16		

### 4.4 Market risk

### **Overview**

Market risk is the risk of adverse impacts on earnings resulting from changes in market factors. Market factors include, but are not limited to, interest rates, credit spreads, foreign exchange rates and equity prices.

The Company's approach to managing market risk is underpinned by its market risk appetite, as informed by the QBE Group, as set by the Company's Board and is summarised below.

The Company's approach to managing investment market movements is underpinned by its investment strategy which outlines the Company's view of the markets and its corresponding investment approach.

Investment market risk is managed through the application of exposure and asset limits. These limits are based on the market risk appetite as determined by the Board and apply to:

- losses generated on the investment portfolio under market stress scenarios. The scenarios assume adverse movements in market factors and are designed to reflect a significant market stress event;
- sensitivities to changes in interest rate and credit spread risk, measured in terms of modified duration and spread duration; and
- total combined holdings in equity, investment property and other growth assets as a proportion of the Company's total investment portfolio.

### Interest rate risk

The Company is exposed to interest rate risk through its holdings in interest-bearing assets. Financial instruments with a floating interest rate expose the Company to cash flow interest rate risk, whereas fixed interest rate instruments expose the Company to fair value interest rate risk.

The Company's risk management approach is to minimise interest rate risk by actively managing investment portfolios to achieve a balance between cash flow interest rate risk and fair value interest rate risk. The Company predominantly invests in high quality, liquid interest–bearing securities and cash, and may use derivative financial instruments to manage the interest rate risk of the fixed interest portfolio. The risk management processes over these derivative financial instruments include close senior management scrutiny, including appropriate board and other management reporting. Derivatives are used only for approved purposes and are subject to delegated authority levels provided to management. The level of derivative exposure is reviewed on an ongoing basis. Appropriate segregation of duties exists with respect to derivative use and compliance with policy, limits and other requirements is closely monitored.

The net central estimate of outstanding claims is discounted to present value by reference to risk-free interest rates. The Company is therefore exposed to potential underwriting result volatility as a result of interest rate movements. In practice, over the longer term, an increase or decrease in interest rates is normally offset by a corresponding increase or decrease in inflation. Details are provided in note 2.3.7. As at the balance sheet date, the average modified duration of cash and fixed interest securities was 1.84 years (2019 2.66 years).

All financial assets are measured at fair value through profit or loss. Movements in interest rates impact the fair value of interest-bearing financial assets and therefore impact reported profit after tax. The impact of a 0.5% increase or decrease in interest rates on interest-bearing financial assets owned by the Company at the balance date is shown in the table below.

FOR THE PERIOD ENDED 31 DECEMBER 2020

	· ·	PROFIT	(LOSS)
	SENSITIVITY %	2020 US\$M	2019 US\$M
Interest rate movement – interest-bearing financial assets	+0.5	(24)	(31)
	-0.5	19	31
Interest rate movement – collective investment schemes	+0.5	-	(3)
	-0.5	_	3

### **Price risk**

Equity price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded on the market.

The Company is exposed to equity price risk on its investment in equities and may use derivative financial instruments to manage this exposure. The risk management processes over these derivative financial instruments are the same as those explained above in respect of interest rate derivative financial instruments. Exposure is also managed by diversification across worldwide markets and currencies where possible.

All equities are measured at fair value through profit or loss. The impact of a 20% increase or decrease in the value of equity investments (including derivatives – refer to note 3.2.1) owned by the Company at the balance date on profit after tax is shown in the table below.

	· ·	PROFIT	(LOSS)
	SENSITIVITY	2020	2019
	%	US\$M	US\$M
FTSE 100	+20	-	1
	-20	-	(1)
S&P 500	+20	_	3
	-20	-	(3)
Infrastructure assets	+20	54	54
	-20	(54)	(54)
CIS – Emerging Markets	+20	_	2
	-20	-	(2)
Private equity	+20	13	10
	-20	(13)	(10)

The Company is also exposed to price risk on its interest-bearing (fixed interest, emerging market and high yield debt) financial assets. All securities are measured at fair value through profit or loss.

### Credit spread risk

Movements in credit spreads impact the value of corporate interest-bearing securities, emerging market debt and high yield debt and therefore impact reported profit after tax. This risk is managed by investing in high quality, liquid interest-bearing securities and by managing the credit spread duration of the corporate securities portfolio.

The impact of either a 0.5% increase or decrease in credit spreads on interest-bearing financial assets held by the Company at the balance date is shown in the table below.

	_	PROFIT	(LOSS)
	SENSITIVITY	2020	2019
	%	US\$M	US\$M
Credit spread movement – corporate interest-bearing financial assets	+0.5	(24)	(18)
	-0.5	15	15
Credit spread movement – collective investment schemes	+0.5	_	(3)
	-0.5	_	3

The Company is also exposed to price risk on its investment in unlisted property trusts. All unlisted property trust investments are measured at fair value through profit or loss. The Company manages this risk by investing in high quality, diversified unlisted property funds. Movements in unit prices impact the value of unlisted property trusts and therefore impact reported profit after tax. The impact of a 10% increase or decrease in unit prices on unlisted property trust securities owned by the Company at the balance sheet date was \$4.4 million (2019 \$3.8 million).

FOR THE PERIOD ENDED 31 DECEMBER 2020

### Foreign exchange

The Company's approach to foreign exchange management is underpinned by the Company's foreign currency strategy. The Company's foreign exchange exposure generally arises as a result of either the translation of foreign currency amounts to the functional currency of a subsidiary's operational segments (operational currency risk) or due to the translation of operating segments net assets to the presentation currency of the Company of US dollars (currency translation risk).

### Operational currency risk

Operational currency risk is managed as follows:

- the Company manages the volatility arising from changes in foreign exchange rates by matching liabilities with assets of the same currency, thus ensuring that any exposures to foreign currencies are minimised; and
- forward foreign exchange contracts are used to protect residual currency positions. These forward foreign exchange contracts are accounted for in accordance with the derivatives accounting policy set out in note 5.5.

Foreign exchange gains or losses arising from operational foreign currency exposures are reported in profit or loss consistent with the gains or losses from the related forward foreign exchange contracts. The risk management process covering the use of forward foreign exchange contracts involves close senior management scrutiny. All forward foreign exchange contracts are subject to delegated authority levels provided to management and the levels of exposure are reviewed on an ongoing basis.

The analysis below demonstrates the impact on profit after income tax of a 10% strengthening or weakening of the major currencies against the functional currencies of the operating segments. The sensitivity is measured with reference to the residual (or unmatched) operational foreign currency exposures at the balance sheet date. Operational foreign exchange gains or losses are recognised in profit or loss in accordance with the procedure outlined in note 1.2.4. The sensitivities provided demonstrate the impact of a change in one key variable in isolation whilst other assumptions remain unchanged.

The sensitivities shown in the table below are relevant only at the balance sheet date, as any unmatched exposures are actively monitored by management and the exposure subsequently matched.

		2020			2019	
	RESIDUAL EXPOSURE	SENSITIVITY	PROFIT (LOSS)	RESIDUAL EXPOSURE	SENSITIVITY	PROFIT (LOSS)
EXPOSURE CURRENCY	US\$M	%	US\$M	US\$M	%	US\$M
Australian dollar	(324)	+10 -10	(32) 32	(101)	+10 -10	(10) 10
Great British pound	(74)	+10 -10	(7) 7	1	+10 -10	_ _
Euro	(28)	+10 -10	(3) 3	22 -	+10 -10	2 (2)
New Zealand dollar	(22)	+10 -10	(2) 2	1 -	+10 -10	_ _ _

### Currency risk in relation to translation of net investment in foreign operations

The Company is exposed to currency risk in relation to the translation of a subsidiary's operating segment functional currencies to the Company's presentation currency of US dollars.

The Company, in accordance with the QBE Group policy, does not ordinarily seek to use derivatives to mitigate currency translation risk on translation to its functional currency of United States dollars for the following reasons:

- currency translation gains and losses generally have no cash flow;
- currency translation gains and losses are accounted for in the foreign currency translation reserve (a component of equity) and therefore do not impact profit or loss unless related to the disposal of an entity; and
- management of translation risk needs to be balanced against the impact on capital requirements and liquidity risk which would be associated with hedging these exposures.

The analysis below demonstrates the impact on equity of a 10% strengthening or weakening against the US dollar of the major currencies to which the Company is exposed through its net asset value of operating segments. The basis for the sensitivity calculation is the Company's actual exposure at the balance date. During 2020 the Company transitioned to only US dollar operating segments, as a result there were nil balances in non US dollar operating segments as at the balance sheet date.

	_	2020			2019

FOR THE PERIOD ENDED 31 DECEMBER 2020

### 4.5 Liquidity risk

### **Overview**

Liquidity risk is the risk of insufficient liquid assets to meet liabilities as they fall due or only being able to achieve the required level of liquidity at excessive cost. The Company's liquidity risk arises due to the nature of insurance activities where the timing and amount of cash outflows are uncertain.

The Company's approach to managing liquidity risk is underpinned by the liquidity risk appetite as set by the Board and is summarised below.

The Company manages liquidity risk using a number of tools, as follows:

- · cash flow targeting;
- maintaining a proportion of liabilities in liquid assets;
- cash flow forecasting; and
- stress testing and contingency planning.

Liquidity is managed across the Company using a number of cash flow forecasting and targeting tools and techniques. Cash flow forecasting involves actively managing operational cash flow requirements.

In addition to treasury cash held for working capital requirements, and in accordance with the Company's liquidity policy, a minimum percentage of investments and cash is held in liquid, short-term money market securities to ensure that there are sufficient liquid funds available to meet insurance and investment obligations. At 31 December 2020, the weighted average duration of cash and fixed interest securities was 1.84 years (2019 2.66 years).

At 31 December 2020 trade payables of \$579 million (2019 \$653 million) have a maturity of one year or less.

Investment payables of \$ nil million (2019 \$139 million) are a result of the timing of investment settlements and have maturity of less than one year.

The Company has amounts due to related entities of \$176 million (2019 \$237 million) of which \$nil million (2019 \$59 million) is repayable in one year or less. The Company has no significant concentration of liquidity risk. The maturity profile of the Company's net discounted central estimate is analysed in note 2.3.6.

The maturity of the Company's directly held interest-bearing financial assets is shown in the table below.

		INTEREST-BEARING FINANCIAL ASSETS MATURING IN						
		LESS THAN ONE YEAR	13 TO 24 MONTHS	25 TO 36 MONTHS	37 TO 48 MONTHS	49 TO 60 MONTHS	OVER 5 YEARS	TOTAL

FOR THE PERIOD ENDED 31 DECEMBER 2020

### 4.6 Operational risk

### **Overview**

Operational risk is the risk of financial loss resulting from inadequate or failed internal processes, people and systems or from external events

Operational risk can materialise in a number of forms including fraud perpetrated by employees or by external parties (e.g. claims fraud or cyber attacks), employment practices (losses arising from breaches of employment, health or safety laws, breach of employment contracts, payment of personal injury claims or diversity and discrimination events), improper business practices (failure to meet professional obligations or issues with the nature or design of an insurance product), disasters and other events, technology and infrastructure failures, or business and transaction processing failures.

The Company's approach to managing operational risk is underpinned by the Company's operational risk appetite as set by the Board and is summarized below.

The Company identifies and assesses operational risk through Risk and Control Self-Assessment (RCSA), top risks and emerging risks processes, stress and scenario testing, and Total Risk Assessment (TRA). The RCSA process identifies and assesses the key risks to achieving business objectives and is conducted at the function unit level. The top risks process involves the identification and assessment of the key risks relating to the entity by its Executive management board. The emerging risks process identifies and assesses new risks, which are characterised by incomplete but developing knowledge or existing risks that develop in new or surprising ways. The stress and scenario testing process assesses the impact of severe but plausible scenarios against the Company's control environment. The TRA process parameterizes the operational risk input to the capital model on an annual basis.

The Company manages operational risk through various systems, controls and processes, including effective segregation of duties, access controls, authorisations and reconciliation procedures, business continuity management, fraud management, information security and physical security. The Company monitors operational risk through control assurance, key risk indicators and internal loss events, issues and actions.

FOR THE PERIOD ENDED 31 DECEMBER 2020

### 4.7 Compliance risk

### **Overview**

Compliance risk is the risk of legal or regulatory penalties, financial loss or impacts and non-financial loss or impacts (including reputational damage) resulting from a breach of obligations. Obligations refers to those in legislation, regulation, industry codes and standards, internal polices and ethical and business standards.

The Company's approach to managing compliance risk is underpinned by QBE Group's risk appetite as set by the QBE Group Board and is summarised below.

The Company manages compliance risk across its governance, culture, stakeholder management, and strategy approach. People, systems and processes must be in place to manage compliance risk and ensure compliance with its obligations.

There are six components for managing compliance risk with defined responsibilities across the three lines of defence:

- Identify compliance obligations and risks;
- Embed compliance requirements into processes, systems and procedures;
- · Communicate and train staff on compliance requirements;
- Monitor key obligations and compliance risks; Report on and assess the state of compliance;
- Identify and rectify issues and incidents.

Compliance management is subject to continuous improvement, recognising regulatory and legal change and, industry, customer and community expectations that may require improvements to compliance management and approach.

### 4.8 Group risk

### **Overview**

Group risk is the risk arising specifically from being part of the wider QBE Group, including financial impact and loss of support from the parent company.

The Company's approach to managing Group risk is underpinned by the Group risk appetite as set by the Group Board and is summarised below.

Sources of Group risk may include:

- intercompany loans;
- contagion reputational risk;
- credit agency dependency;
- use of Group functions where there is a global operating model in place;
- use of QBE's internal asset management function;
- QBE Group initiatives or decisions with a material impact on the Company; and
- liquidity and central foreign exchange management.

The Company manages Group risk through various systems, controls and processes, use of intercompany transactions and balances accounting guidance, transfer pricing guidelines, investment management agreement, capital planning and assessments of the use of QBE Group functions, QBE Group initiatives and contagion reputational events.

FOR THE PERIOD ENDED 31 DECEMBER 2020

### 5. CAPITAL STRUCTURE

### **Overview**

The Company's objective in managing capital is to reduce the overall cost of capital whilst satisfying the capital adequacy requirements of its regulator, providing financial security for our policyholders and continuing to provide an adequate return to our shareholder.

Details of the Company's approach to capital risk management are disclosed in note 4.1.

### 5.1 Cash and cash equivalents

NOTE	2020 US\$M	2019 US\$M
Cash at bank and on hand	49	38
Term deposits	261	-
	310	38

### Restrictions on use

There are no restrictions on amounts included in cash and cash equivalents as at December 31, 2020.

### How we account for the numbers

Cash and cash equivalents include cash at bank and on hand and deposits at call which are readily convertible to cash on hand and which are used for operational cash requirements. Amounts in cash and cash equivalents are the same as those included in the statement of cash flows.

The reconciliation of profit after income tax to cash flows from operating activities is included in note 7.3.

FOR THE PERIOD ENDED 31 DECEMBER 2020

### 5.2 Equity and reserves

### **Overview**

Ordinary shares in the Company rank after all creditors, have a par value of \$1.00 and entitle the holder to participate in dividends and the proceeds on winding up of the company, in proportion to the number of shares held.

During the current period, the Company issued ordinary shares and preference shares, details of which are set out in note 5.2.1. The preference shares together with ordinary shares, are presented as contributed equity in the consolidated balance sheet.

### 5.2.1 Contributed equity

	31 DECEMBER 2020 US\$M	31 DECEMBER 2019 US\$M
Issued ordinary shares, fully paid	1,099	871
Issued preference shares, fully paid	70	_
Contributed equity	1,169	871

### **Ordinary share capital**

	2020		2019	
	NUMBER OF SHARES MILLIONS	US\$M	NUMBER OF SHARES MILLIONS	US\$M
Authorised shares	1,351	-	1,101	
Issued ordinary shares, fully paid at 1 January Shares issued during the year	1,024 228	871 228	1,024 _	871 –
Issued ordinary shares, fully paid at 31 December	1,252	1,099	1,024	871

During the year the Company issued 228,000,000 additional common shares to its parent, QBE Investments (North America), Inc., at \$1 per share. The shares were issued on 25 March 2020 (50,000,000 shares), 29 June 2020 (75,000,000 shares) and 23 December 2020 (103,000,000 shares).

### **Preference share capital**

	2020		2019	
	NUMBER OF SHARES MILLIONS	US\$M	NUMBER OF SHARES MILLIONS	US\$M
Shares issued during the year	70	70	_	_
Issued preference shares, fully paid at 31 December	70	70	_	_

On 13 March 2020, the Company issued 70,000,000 Class A Non-Cumulative Redeemable Preferred Shares to its parent, QBE Investments (North America), Inc., at \$1 per share with a 7% annual dividend, non-redeemable for 10 years. Dividends are payable only if declared by the Board and are non-cumulative. Accordingly, if the Board does not declare a dividend on the Class A Preferred shares in respect of any reporting period, such dividend will not be payable and the Company will have no obligation to pay a dividend for that period or at any future time. The holders of the Class A Preferred Shares shall not have any right or option to call for the redemption of the shares.

FOR THE PERIOD ENDED 31 DECEMBER 2020

### 5.2.2 Reserves

	2020	2019
	US\$M	US\$M
Foreign currency translation reserve		
At 1 January	(143)	(114)
Movement in the year	(47)	(29)
At 31 December	(190)	(143)

### 5.3 Dividends

### **Overview**

The Company's dividend policy is to transfer excess capital above its target capital level to the parent entity. Excess capital is determined with reference to the capital strategy which determines the capital target as the aggregate of the regulatory capital requirement and a buffer above regulatory minimum capital. The buffer is expressed as a percentage of the regulatory minimum and is determined with reference to a probability of breaching regulatory minimum. As per the Insurance Act s31B, Class 3A and Class 3B insurers cannot, without BMA prior approval, pay out more than 25% of total statutory capital and surplus as determined in the prior year's filing. The policy does not prescribe the split of divided between interim and final, as this will be contingent on the capital available at each date.

	2020	2019
Dividend per share (US cents)	-	10
Total dividend payout (US\$M)	-	100

### 5.4 Earnings per share

### **Overview**

Earnings per share (EPS) is the amount of profit or loss after tax attributable to each share.

	2020	2019
	US CENTS	US CENTS
Basic (loss) earnings per share	(6)	6

### 5.4.1 (Loss) earnings used in calculating earnings per share

	2020 US\$M	2019 US\$M
Net (loss) profit after income tax attributable to ordinary equity holders of the company used in calculating basic (loss) earnings per share	(63)	59

FOR THE PERIOD ENDED 31 DECEMBER 2020

### 5.4.2 Ordinary shares used in calculating earnings per share

	2020 NUMBER OF	2019 NUMBER OF
Weighted average number of ordinary shares used as the denominator in calculating basic	SHARES	SHARES
earnings per share	1,102,663,384	1,023,899,000

### How we account for the numbers

### Basic (loss) earnings per share

Basic (loss) earnings per share is calculated by dividing net (loss) profit after income tax attributable to members of the company by the weighted average number of ordinary shares outstanding at the year end.

### 5.5 Derivatives

### **Overview**

Derivatives may be used as a tool to hedge the Company's foreign exchange exposures. The Company manages operational foreign exchange volatility by matching liabilities with assets of the same currency, as far as practicable. Forward foreign exchange contracts are used to hedge residual currency exposures, with both the foreign exchange and derivatives impact reported through profit or loss.

Refer to note 4.4 for additional information relating to the Company's approach to managing currency risk.

The Company's exposure to foreign exchange derivatives at the balance date is set out in the table below:

		2020			2019	
	EXPOSURE	FAIR VALUE ASSET	FAIR VALUE LIABILITY	EXPOSURE	FAIR VALUE ASSET	FAIR VALUE LIABILITY
	US\$M	US\$M	US\$M	US\$M	US\$M	US\$M
Forward foreign exchange contracts	654	33	(91)	699	10	(11)

### How we account for the numbers

Derivatives are initially recognised at fair value, being the transaction price on the date a derivative contract is entered into, and are subsequently remeasured to their fair value. The method of recognising the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and the nature of the item being hedged. Derivatives which are not part of a hedging relationship are valued at fair value through profit or loss.

For derivatives traded in an active market, the fair value of derivatives presented as assets is determined by reference to published closing bid price quotations, and the fair value of derivatives presented as liabilities is determined by reference to published closing ask price quotations. For derivatives that are not traded or which are traded in a market that is not sufficiently active, fair value is determined using generally accepted valuation techniques, including the use of forward exchange rates for the valuation of forward foreign exchange contracts.

FOR THE PERIOD ENDED 31 DECEMBER 2020

### 6. TAX

### **Overview**

Income tax expense is the accounting tax charge for the period and is calculated as the tax payable on the current period taxable income based on the applicable income tax rates for each jurisdiction, adjusted for changes in deferred tax assets and liabilities attributable to temporary differences and unused tax losses. The relationship between accounting profit and income tax expense is provided in the reconciliation of prima facie tax to income tax expense (note 6.1). Income tax expense does not equate to the amount of tax actually paid to tax authorities, as it is based upon the accrual accounting concept.

Accounting income and expenses do not always have the same recognition pattern as taxable income and expenses, creating a timing difference as to when a tax expense or benefit can be recognised. These differences usually reverse over time but until they do, a deferred tax asset or liability is recognised on the balance sheet. Note 6.2 details the composition and movements in deferred tax balances.

### Bermuda

Under current Bermuda law, the Company is not required to pay any taxes in Bermuda on either income or capital gains. The Company has received an undertaking from the Bermuda government exempting it from all local income, withholding and capital gains taxes until March 31, 2035. At the present time no such taxes are levied in Bermuda.

### **United States**

The Company made an irrevocable election under Section 953(d) of the United States Internal Revenue Code of 1986, as amended, to be taxed as a U.S. domestic insurance company for U.S. federal income tax purposes with effect from 1 April 2018. This election was approved by the United States Internal Revenue Service on 7 February 2020. As a result of this "domestic election", the Company is subject to U.S. federal taxation on its world-wide income as if it were a U.S. corporation.

The Company's approach to managing tax risk is disclosed in note 4.1.

### 6.1 Reconciliation of prima facie tax to income tax expense (credit)

	NOTE	2020 US\$M	2019 US\$M
(Loss) profit before income tax		(54)	91
Prima facie tax (income) expense at 21%		(11)	19
Tax effect of non-temporary differences:			
Other income		_	2
Creditable premium tax		8	11
Prima facie tax adjusted for non-temporary differences		(3)	32
Underprovision in prior years		12	_
Income tax expense		9	32
Analysed as follows:			
Current tax		(3)	21
Deferred tax		12	11
		9	32

### How we account for the numbers

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and establishes provisions where appropriate on the basis of amounts expected to be paid to tax authorities.

Current tax assets and tax liabilities are offset where the Company has a legally enforceable right to offset and intends to either settle on a net basis or to realise the assets and settle the liability simultaneously. Current and deferred tax is recognised in profit or loss.

FOR THE PERIOD ENDED 31 DECEMBER 2020

Non creditable premium taxes deducted by foreign jurisdictions are expensed when notified and included within underwriting deductions.

Creditable income taxes withheld by ceding affiliates or investment counterparties on behalf of foreign jurisdictional tax authorities are recognised when so withheld and included in income tax expense. No deferred tax assets or liabilities are currently recognised given the Company's exempt tax status.

### 6.2 Deferred income tax

		2020	2019
	NOTE	US\$M	US\$M
Deferred tax assets	6.2.1	88	68
Deferred tax liabilities	6.2.2	33	1
Net deferred tax assets		55	67

### 6.2.1 Deferred tax assets

NOTI	2020 US\$M	2019 US\$M
Amounts recognised in profit and loss		
Provision for impairment	2	4
Insurance provisions	84	64
Tax losses recognised	2	_
6.2	88	68
Deferred tax assets before set-off	88	68
Set-off of deferred tax liabilities 6.2.2	(33)	(1)
6.2	55	67

### Movements:

Amounts recognised in profit and loss			
Insurance provisions		28	(1)
Financial assets – fair value movements		2	(1)
Financial liabilities - related		3	_
	6.2	33	(2)
Deferred tax liabilities before set-off		33	1
Set-off of deferred tax assets	6.2.1	(33)	(1)
		_	_

FOR THE PERIOD ENDED 31 DECEMBER 2020

### Movements:

	NOTE	2020 US\$M	2019 US\$M
At 1 January	•	1	3
Amounts recognised in profit or loss		32	(2)
At 31 December		33	1

### How we account for the numbers

Deferred income tax is provided in full using the liability method on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

FOR THE PERIOD ENDED 31 DECEMBER 2020

### 7. OTHER

### **Overview**

This section includes other information that must be disclosed to comply with the Australian Accounting Standards or the *Corporations Act 2001* of the Commonwealth of Australia.

### 7.1 Other accounting policies

### 7.1.1 New and amended standards adopted by the Company

The Company adopted the following new or revised accounting standards which became effective for the annual reporting period commencing on 1 January 2020.

TITLE	
Revised Conceptual	Framework For Financial Reporting
AASB 2018-6	Definition of a Business
AASB 2018-7	Definition of Material
AASB 2019-1	References to the Conceptual Framework
AASB 2019-3	Interest Rate Benchmark Reform
AASB 2019-5	Disclosure of the Effect of New IFRS Standards Not Yet Issued in Australia

The adoption of these new or revised standards did not significantly impact the Company's accounting policies or financial statements.

### 7.1.2 New accounting standards and amendments issued but not yet effective

TITLE		OPERATIVE DATE
AASB 2020-8	Interest Rate Benchmark Reform – Phase 2	1 January 2021
AASB 2014-10	Sale or Contribution of Assets between an Investor and its Associate or Joint Venture	1 January 2022
AASB 2020-1	Classification of Liabilities as Current or Non-current	1 January 2022
AASB 2020-3	Annual Improvements 2018-2020 and Other Amendments	1 January 2022
AASB 2020-4	Covid-19 Related Rent Concessions	1 January 2022
AASB 17	Insurance Contracts	1 January 2023

The Australian Accounting Standards and amendments detailed in the table above are not mandatory for the Company until the operative dates stated; however, early adoption is often permitted.

The Company plans to adopt the standards and amendments detailed above in the reporting periods beginning on their respective operative dates. An initial assessment of the financial impact of the standards and amendments has been undertaken and they are not expected to have a material impact on the Company's financial statements, except where noted below.

### **AASB 17 Insurance Contracts**

AASB 17, a new accounting standard for insurance contracts, was adopted by the Australian Accounting Standards Board in July 2017. The IASB subsequently issued amendments to IFRS 17 in June 2020 to address feedback and implementation issues raised by stakeholders. The amendments were adopted by the AASB in July 2020 and include the deferral of the mandatory effective date to reporting periods on or after 1 January 2023 (previously 1 January 2020).

The standard will be applicable to general, life and health insurance business and introduces a new 'general model' for recognition and measurement of insurance contracts. It also permits application of a simplified model (which is similar to the current basis on which general insurance is brought to account under AASB 1023) if the liability for remaining coverage under the simplified model would not materially differ from the general model.

QBE Group has completed a global impact assessment and additional analysis on key areas of interpretation and has determined that the simplified approach is expected to apply to more than 95% of QBE Group's business, based on the existing business mix. This analysis also identified requirements of AASB 17 where the technical interpretation remains unclear. Given the recent significant amendments to the standard and the broad scope, complexity and lack of general consensus on the interpretation of key components of the standard, the impact of AASB 17 on the Company's financial statements is still being determined; however, significant disclosure changes and some impact on reported profit or loss are expected. We continue to monitor market developments in order to assess the impact of changes and evolving interpretations on the Company and to prepare our financial reporting systems for the required changes.

FOR THE PERIOD ENDED 31 DECEMBER 2020

### 7.2 Contingent liabilities

### **Overview**

Contingent liabilities are disclosed when the possibility of a future settlement of economic benefits is considered to be less than probable but more likely than remote. If the expected settlement of the liability becomes probable, a provision is recognised.

In the normal course of business, the Company is exposed to contingent liabilities in relation to claims litigation and regulatory examination arising out of its insurance and reinsurance activities. The Company may also be exposed to the possibility of contingent liabilities in relation to non-insurance litigation and compliance matters, which may result in legal or regulatory penalties and financial or non-financial losses and other impacts.

Provisions are made for obligations that are probable and quantifiable. There are no amounts otherwise not provided for in the financial statements. The Company has no contingent liabilities to disclose. There are no individually significant amounts not provided for and such transactions are not considered likely to have a material impact on the net assets of the Company.

### 7.3 Reconciliation of profit after income tax to cash flows from operating activities

### **Overview**

AASB 1054 Australian Additional Disclosures requires a reconciliation of profit after income tax to cash flows from operating activities.

	2020	2019
	US\$M	US\$M
(Loss) profit after income tax	(63)	59
Adjustments for:		
Net foreign exchange profits	8	5
Other gains on financial assets	(415)	(183)
Balance sheet movements:		
Increase in net outstanding claims	720	10
Increase / (decrease) in unearned premium	44	(102)
(Increase) in deferred insurance costs	(37)	(97)
(Increase) / decrease in trade debtors	(323)	468
Decrease / (increase) in other operating assets	4	(1)
Decrease in net amounts receivable from related entities	2	8
(Decrease) / increase in trade payables	(52)	126
Increase in other payables and provisions	9	31
Increase in intangibles	1	1
Net cash flows from operating activities	(102)	325

FOR THE PERIOD ENDED 31 DECEMBER 2020

### 7.4 Related parties

### **Overview**

AASB 124 Related Party Disclosures requires disclosure of related party transactions. The majority of all inwards reinsurance business assumed is from related entities, with only an immaterial amount of third party business being written during the year. All outwards reinsurance business is placed with third parties. In addition, the Company has entered into a number of outsourced service agreements with related entities.

All material information required to be disclosed under AASB 124: Related Party Disclosures has been included in the financial statements, as follows:

	Reference	
Interest received or receivable from related entities	Note 3.1	
Amounts due from related entities	Note 2.6	
Amounts due to related entities	Note 2.7	

The Company holds related party corporate bonds to the value of \$ nil (2019 \$243 million) within its investment portfolio (note 3.2) and has accrued interest in respect of those bonds of \$ nil (2019 \$2 million) within other receivables (note 2.6).

The Company has entered into a number of outsourced service agreements with related entities. Details of related entities, the services provided and the fees charged are as follows:

Related entity	Services provided	2020	2019
		\$000	\$000
QBE Group Services Pty Ltd	Investment management services	2,769	1,957
QBE Group Services Pty Ltd	QBE Group head office services and license fee	1,368	513
QBE Americas Inc.	System and infrastructure support	191	1,671
QBE Group Shared Services Limited	Reinsurance technical services, financial reporting, claims administration support	1,443	1,062
		5,771	5,203

FOR THE PERIOD ENDED 31 DECEMBER 2020

### 7.5 Remuneration of auditors

### **Overview**

The Company may engage the external auditor for non-audit services other than excluded services, subject to the general principle that fees for non-audit services should not exceed 50% of all fees paid to the external auditor in any one financial year. The Board believes some non-audit services are appropriate given the external auditor's knowledge of the Company.

The external auditor cannot provide the excluded services of preparing accounting records or financial reports or acting in a management capacity.

	2020	2019
	\$000	\$000
Audit and assurance services	446	475

### 7.6 Presentation of comparative information

Certain comparative amounts have been reclassified to ensure presentation is consistent with current year presentation. The reclassification had no impact on overall profit or net asset position previously reported.

### Directors' declaration

In the directors' opinion:

- (a) the financial statements and notes set out on pages 10 to 56 are in accordance with the *Corporations Act 2001* of the Commonwealth of Australia, including:
- (i) complying with accounting standards, the *Corporations Regulations 2001* of the Commonwealth of Australia and other mandatory professional reporting requirements applicable under Australian Accounting Standards; and
  - (ii) giving a true and fair view of the Company's financial position as at 31 December 2020 and of its performance for the financial year ended on that date; and
- (b) there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

Note 1.2.1 confirms that the financial statements comply with International Financial Reporting Standards as issued by the International Accounting Standards Board.

Signed in HAMILTON, Bermuda this 28th day of April 2021, in accordance with a resolution of the directors.

### Independent auditor's report

To the Board of Directors and Shareholder of QBE Blue Ocean Re Limited

### Our opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of QBE Blue Ocean Re Limited (the Company) and its subsidiaries (together 'the Group') as at December 31, 2020, and their consolidated financial performance and their consolidated cash flows for the year then ended in accordance with the Australian equivalent of International Financial Reporting Standards (otherwise known as Australian Accounting Standards).

### What we have audited

The Group's consolidated financial statements comprise:

- the consolidated statement of comprehensive income for the year ended December 31, 2020;
- the consolidated balance sheet as at December 31, 2020;
- the consolidated statement of changes in equity for the year then ended;
- the consolidated statement of cash flows for the year then ended; and
- the notes to the consolidated financial statements, which include significant accounting policies and other explanatory information.

### Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Independence

We are independent of the Group in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA Code) and the ethical requirements of the Chartered Professional Accountants of Bermuda Rules of Professional Conduct (CPA Bermuda Rules) that are relevant to our audit of the consolidated financial statements in Bermuda. We have fulfilled our other ethical responsibilities in accordance with the IESBA Code and the ethical requirements of the CPA Bermuda Rules.

### Other information

Management is responsible for the other information. The other information comprises the Annual Report (but does not include the consolidated financial statements and our auditor's report thereon).

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with Australian Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

### Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

Identify and assess the risks of material misstatement of the consolidated financial statements,
whether due to fraud or error, design and perform audit procedures responsive to those risks, and
obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of
not detecting a material misstatement resulting from fraud is higher than for one resulting from error,

Reference: Independent Auditor's Report on the Consolidated Financial Statements of QBE Blue Ocean Re Limited and its subsidiaries as at December 31, 2020 and for the year then ended

as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures
  that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
  effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements.
   We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
